INTRODUCTION TO STO SECURITIES TRADING ORGANIZATION

INTRODUCTION TO SECURITIES TRADING ORGANIZATION

SPORTS GOODS RETAILER

Buys 100 Training Shoes (colour blue) at USD 70.00 each from the Sports Supply Company (SSC) on 15th June for delivery on 25th June - total due to pay USD 7000.00

the following is recorded

Trade Date	Operation	Quantity	Goods	Price	Supplier	Del. Date	Cash Due
15th June	Buy	100	Trainers Blue	USD 70.00	Sports Supply Co.	25th June	USD 7000.00

Required location of trainers:	Cash to be paid from:
Retailer's Warehouse No. 1, New York	Retailer's account at Bank X, New York

SECURITIES TRADING ORGANISATION (STO)

Buys 2000 Sony Corporation shares at Yen 14,100 each from Counterparty X, London on 15th June for delivery on 25th June - total due to pay Yen 28,200,000

the following is recorded

Trade Date	Operation	Quantity	Securities	Price	Counterparty	Value Date	Cash Due
15th June	Buy	2000	Sony Corp. Shares	Yen 14,100	Counterparty X	25th June	Yen 28,200,000

Required location of securities:	Cash to be paid from:
STO's *CUSTODIAN*, Cust. E, Tokyo	STO's *CUSTODIAN*, Cust. E, Tokyo

The term securities trading organization is a collective term that describes those who reside within the securities marketplace, namely Brokers and Dealers/Market Makers, who (on their own behalf) sell securities to or buy securities

- **Securities STO :** Broker/Dealer Firms-IB
- **Counterparty/Clients of STO:** Investors/Trader

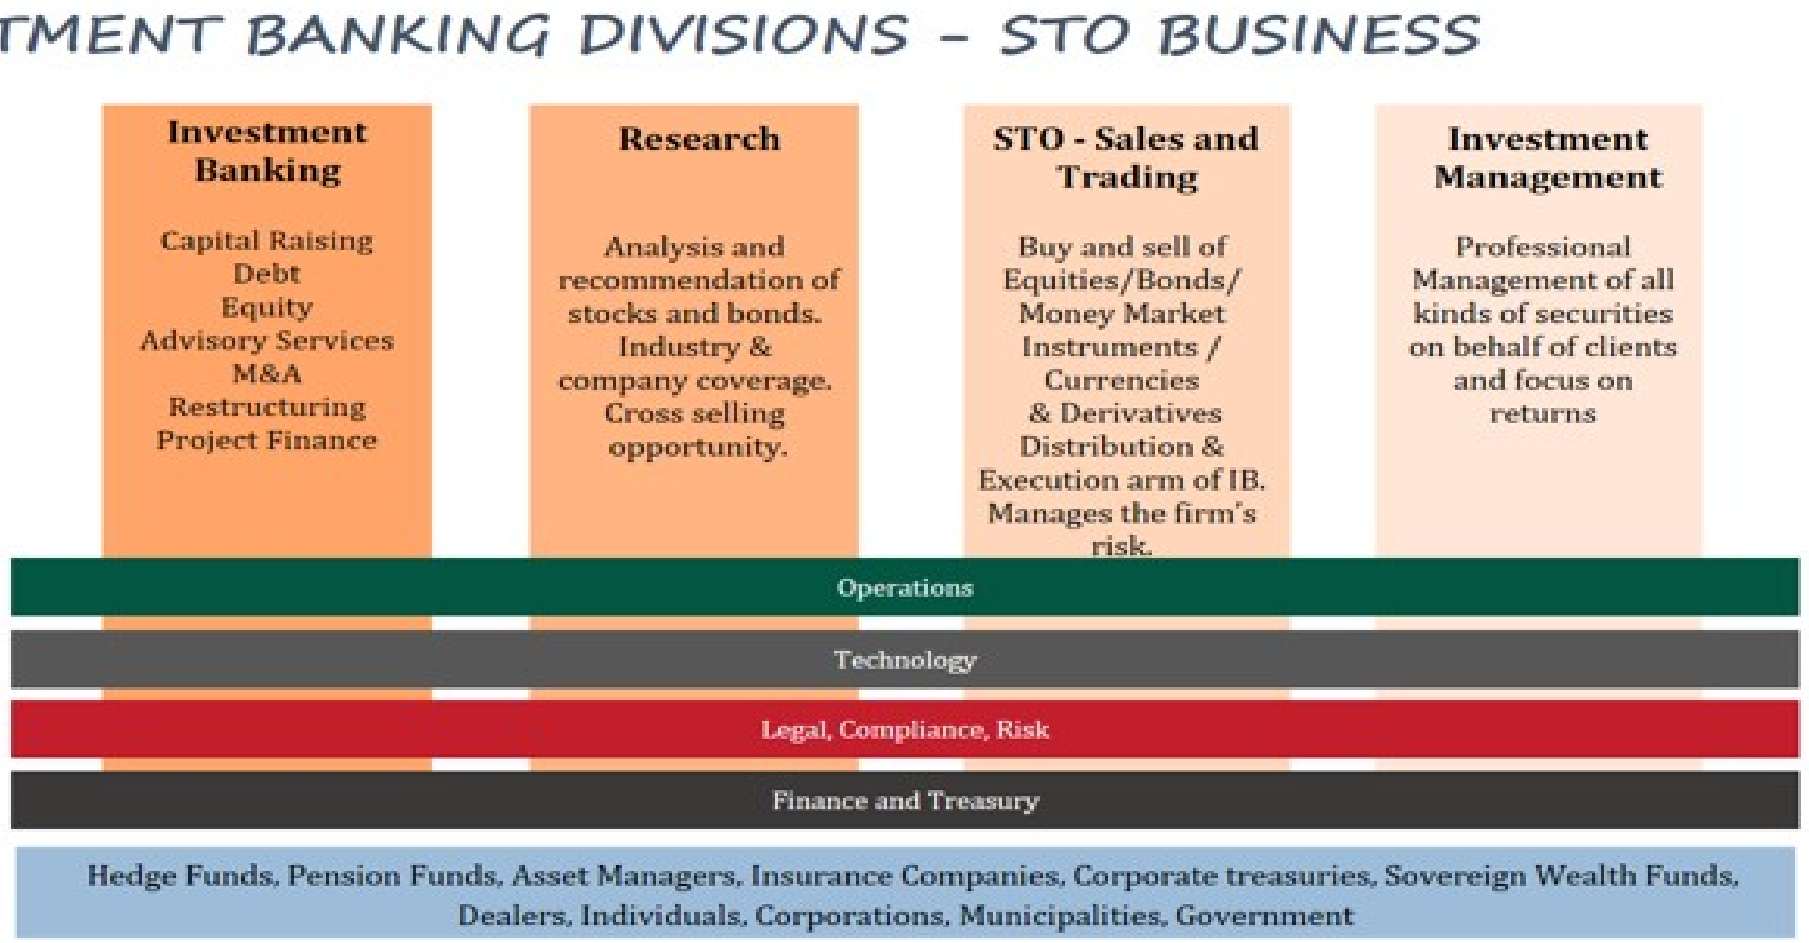

1. Institutional Investors - Mutual Funds/Soverign Wealth Funds/Pension Funds/Endowment Funds Insurance Companies/NGOs

2. Corporate Treasuries

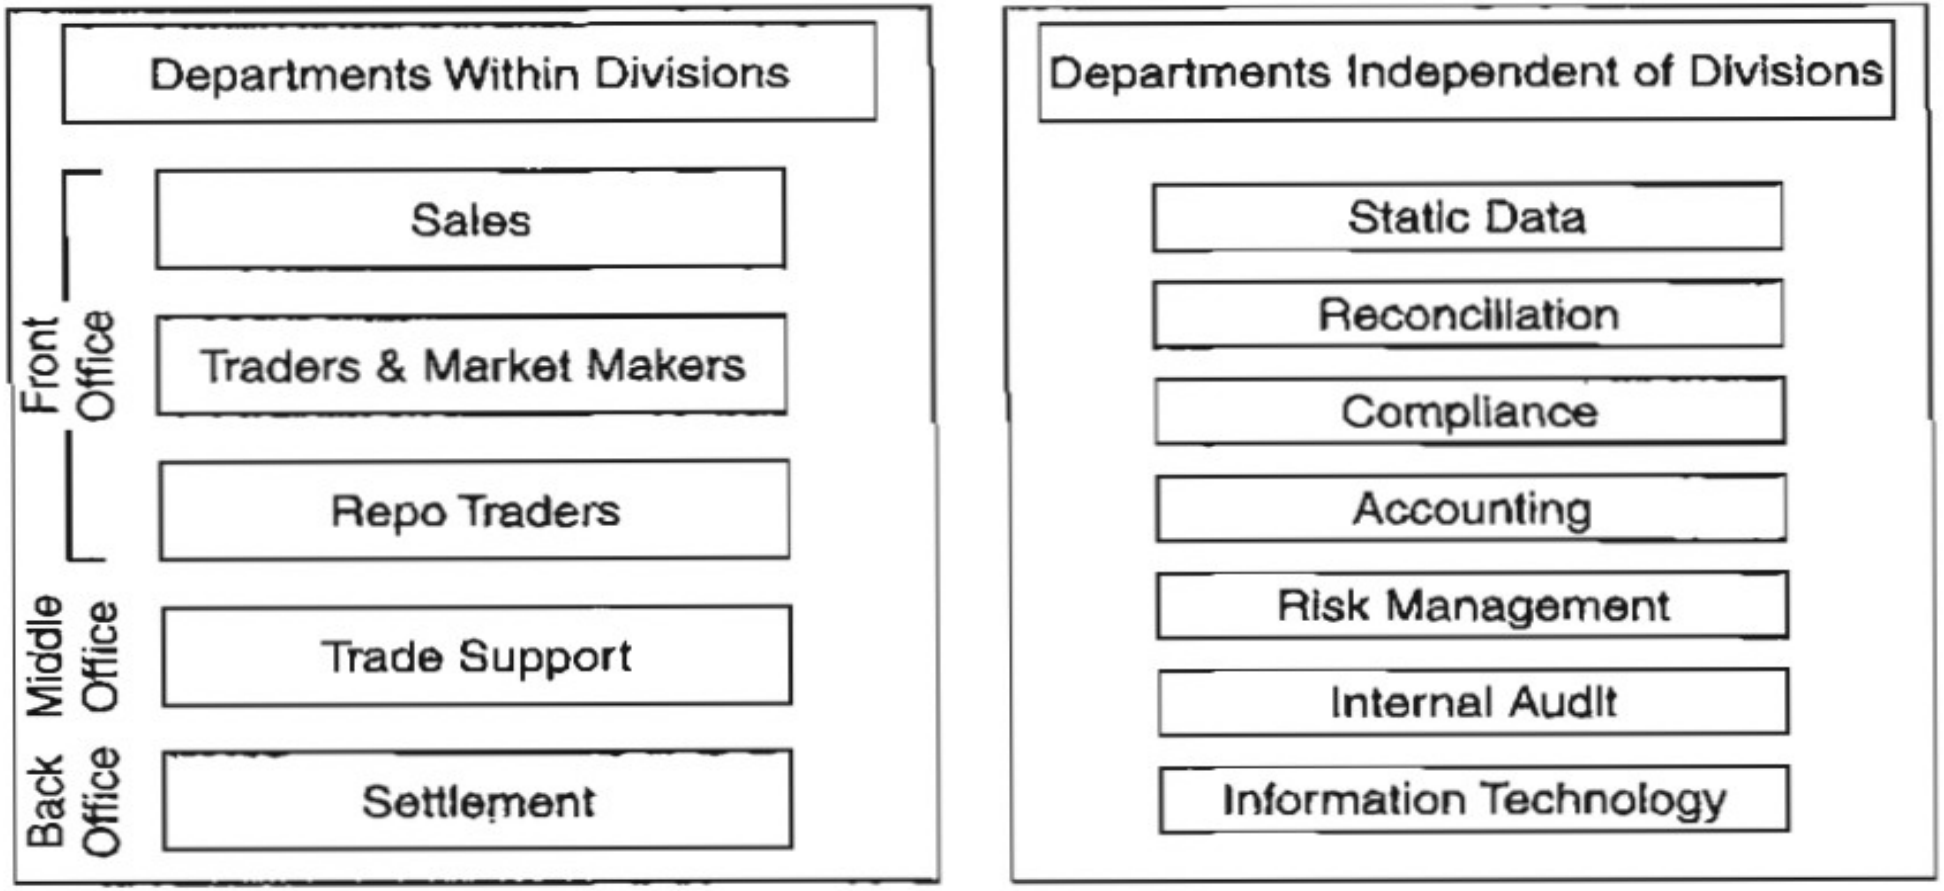

STO

A Securities Trading Organization (STO) is a financial institution or division within a financial institution that specializes in facilitating securities trading on behalf of clients, typically institutional investors such as hedge funds, asset managers, and other market participants. The primary goal of an STO is to provide clients with efficient execution of their trading orders while offering market insights and advisory services. STOs often operate within larger investment banks or brokerage firms. Here's a brief introduction to the components, departments, and roles within an STO:

Investment Banking Divisions

STO - DEPARTMENTS

STO’S DEPARTMENTS

1. Sales Trading Department:

- **Sales Traders:** Sales traders are responsible for establishing and maintaining relationships with clients. They communicate with clients to understand their trading needs and objectives, provide market insights and investment ideas, and execute trading orders on behalf of clients. Sales traders aim to offer personalized service and execute trades efficiently at competitive prices.

STO’S DEPARTMENTS

2. Trading Desk:

- **Execution Traders:** Execution traders focus on executing trading orders promptly and efficiently. They use various trading platforms and technologies to access markets and execute orders in line with the clients' instructions. Execution traders must ensure best execution, which means obtaining the most favorable terms for the client.

- **Algorithmic Trading Teams:** These teams develop and implement algorithmic trading strategies designed to optimize trade execution by splitting orders into smaller parts, using market data, and considering factors like price, volume, and timing.

- **Risk Management:** The risk management team monitors and manages the risk associated with trading activities. They ensure that trading positions and risk exposure are within acceptable limits. This department also manages post-trade settlement and reconciliation processes

STO’S DEPARTMENTS

3. Research Department:

- **Equity Research Analysts:** Equity research analysts provide clients with in-depth research reports and analysis on specific stocks, sectors, or industries. Their research helps clients make informed investment decisions.

- **Fixed Income Research Analysts:** Fixed income research analysts focus on bonds and other fixed-income securities. They analyze credit risk, interest rate trends, and market conditions to provide insights to clients

STO’S DEPARTMENTS

IMARTICUS LEARNING

4. Compliance and Regulatory Affairs:

- **Compliance Officers:** Compliance officers ensure that the STO operates in accordance with relevant financial regulations and internal policies. They monitor trading activities, conduct audits, and educate staff on compliance requirements.

- **Regulatory Affairs Specialists:** These professionals keep the STO informed about changing regulatory requirements and help the organization adapt to new rules and reporting obligations.

STO’S DEPARTMENTS

IMARTICUS LEARNING

5. Operations and Settlement:

- **Operations Specialists:** Operations teams handle the processing, settlement, and reconciliation of trades. They ensure that trades are accurately settled, confirmations are sent to clients, and any discrepancies are resolved.

- **Middle Office:** The middle office provides support for both the front and back offices, including risk management, trade support, and monitoring of trading systems.

STO’S DEPARTMENTS

IMARTICUS LEARNING

6. Technology and IT Support:

- **Technology Specialists:** IT and technology teams are responsible for maintaining and enhancing the STO's trading platforms, connectivity to markets, and algorithmic trading systems. They ensure that the technology infrastructure is robust and secure.

7. Client Services:

- **Client Service Representatives:** Client service representatives assist clients with account-related inquiries, trading issues, and operational matters. They act as a liaison between clients and the STO's various departments.

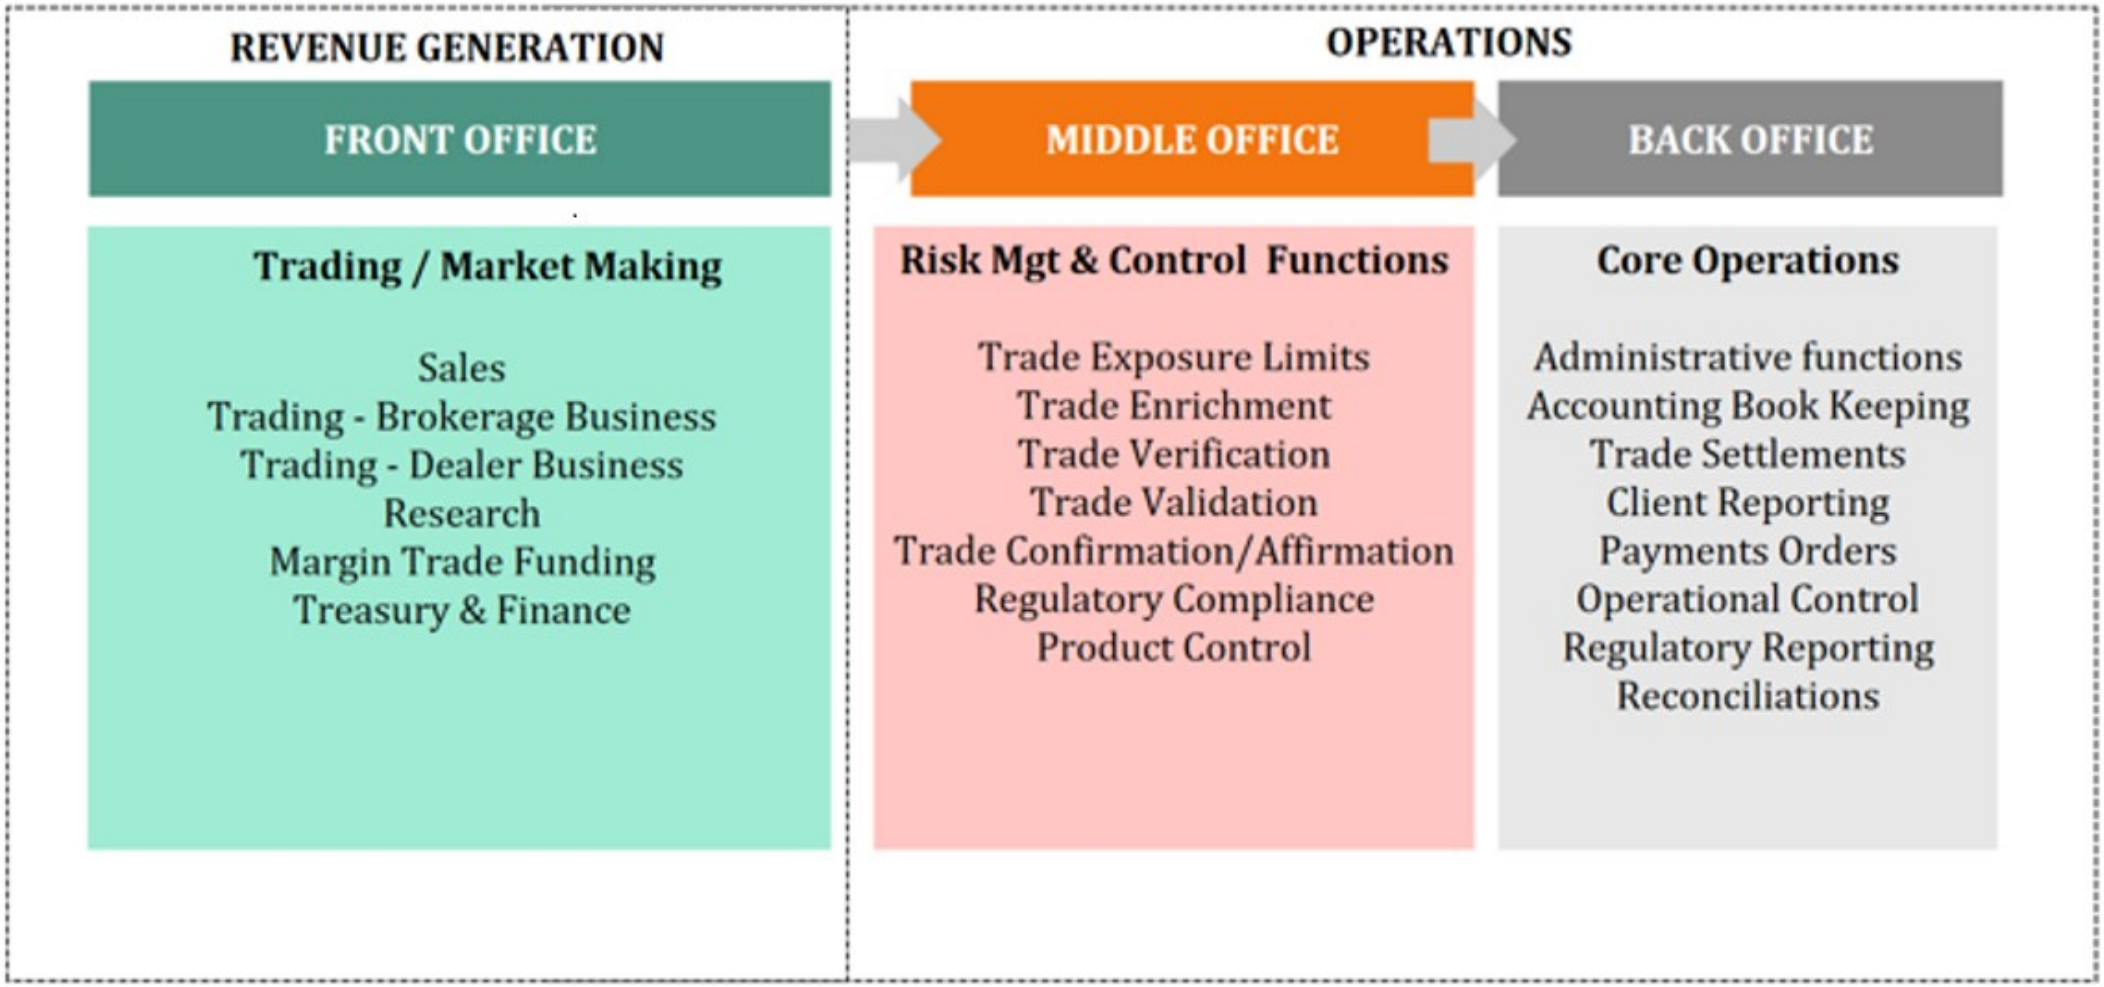

STO’S DEPARTMENTS

8. Relationship Management:

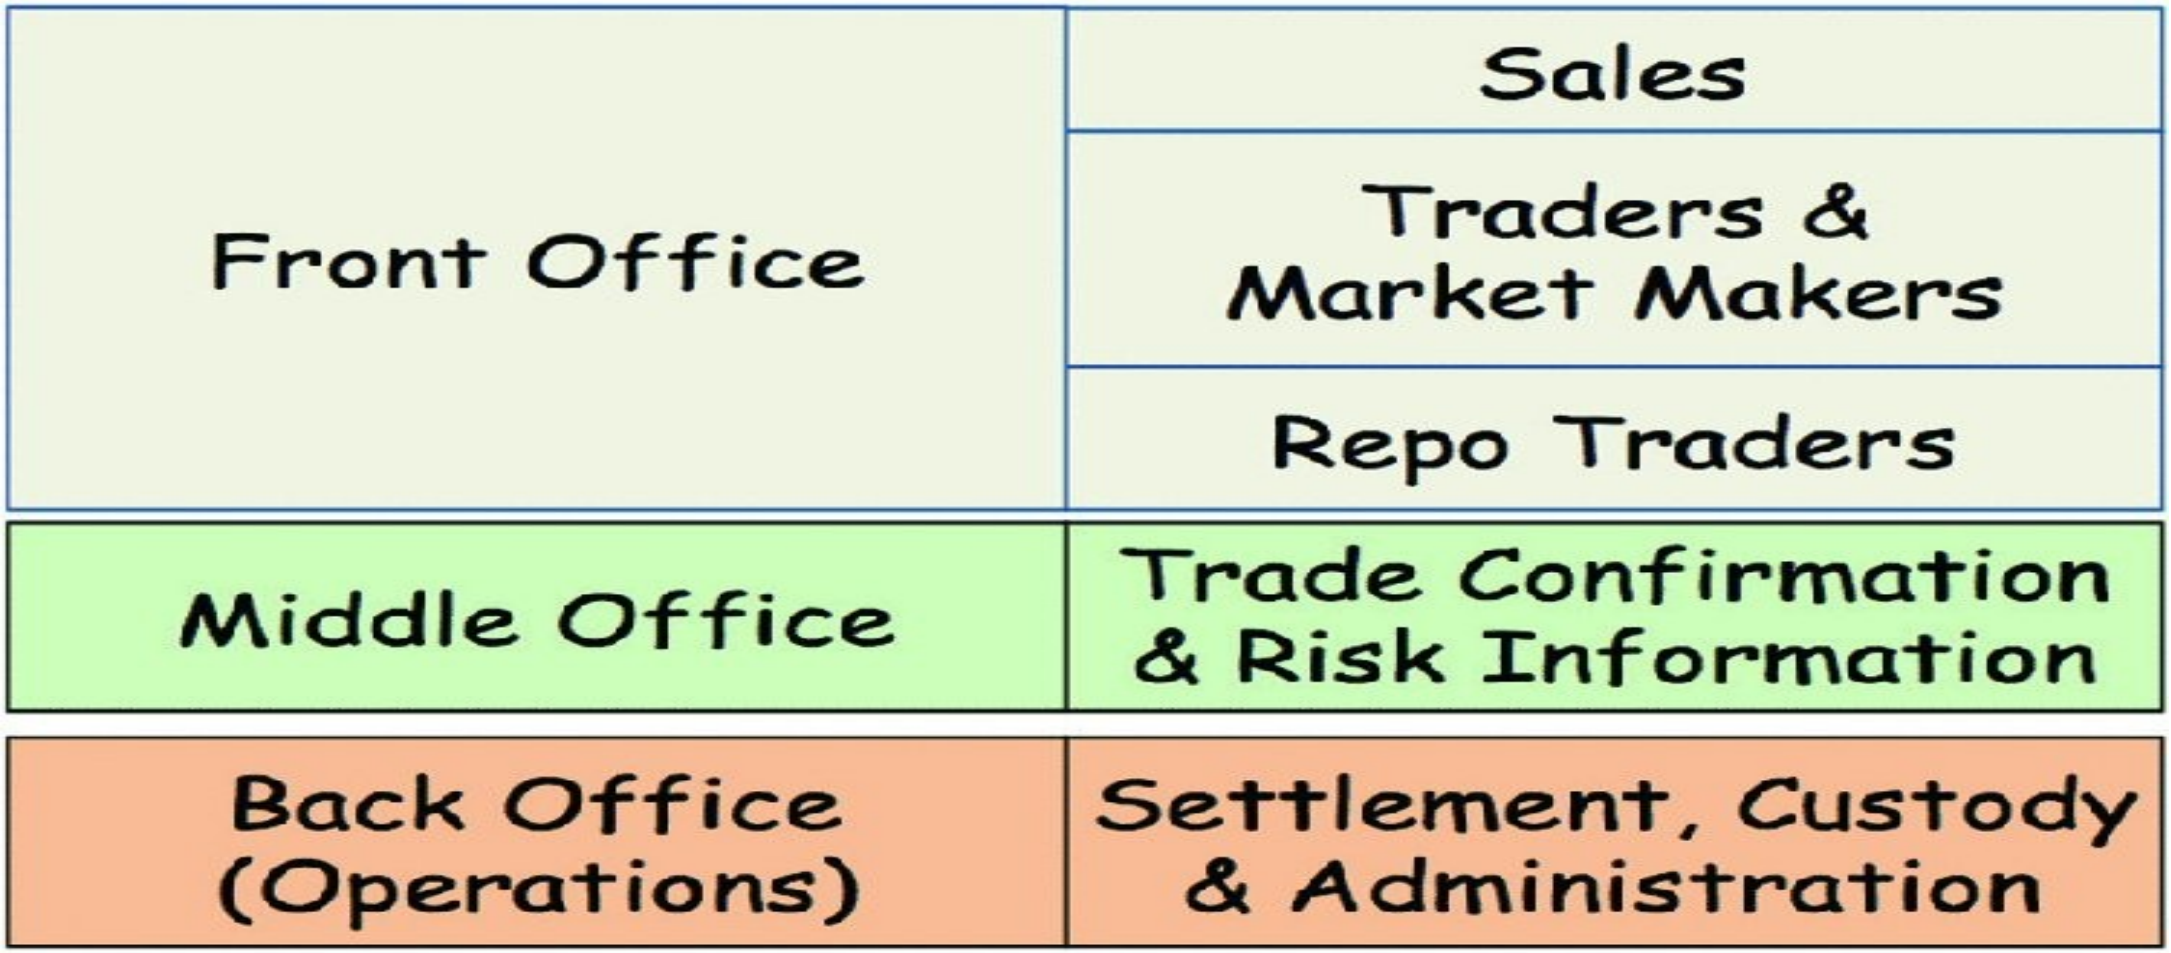

- **Relationship Managers:** Relationship managers work closely with key clients to understand their needs, offer tailored solutions, and ensure a high level of client satisfaction.

STRUCTURE IN AN STO ORGANISATION

STO - DEPARTMENTS

RDM

UNDERSTAND REFERENCE DATA MANAGEMENT (RDM)

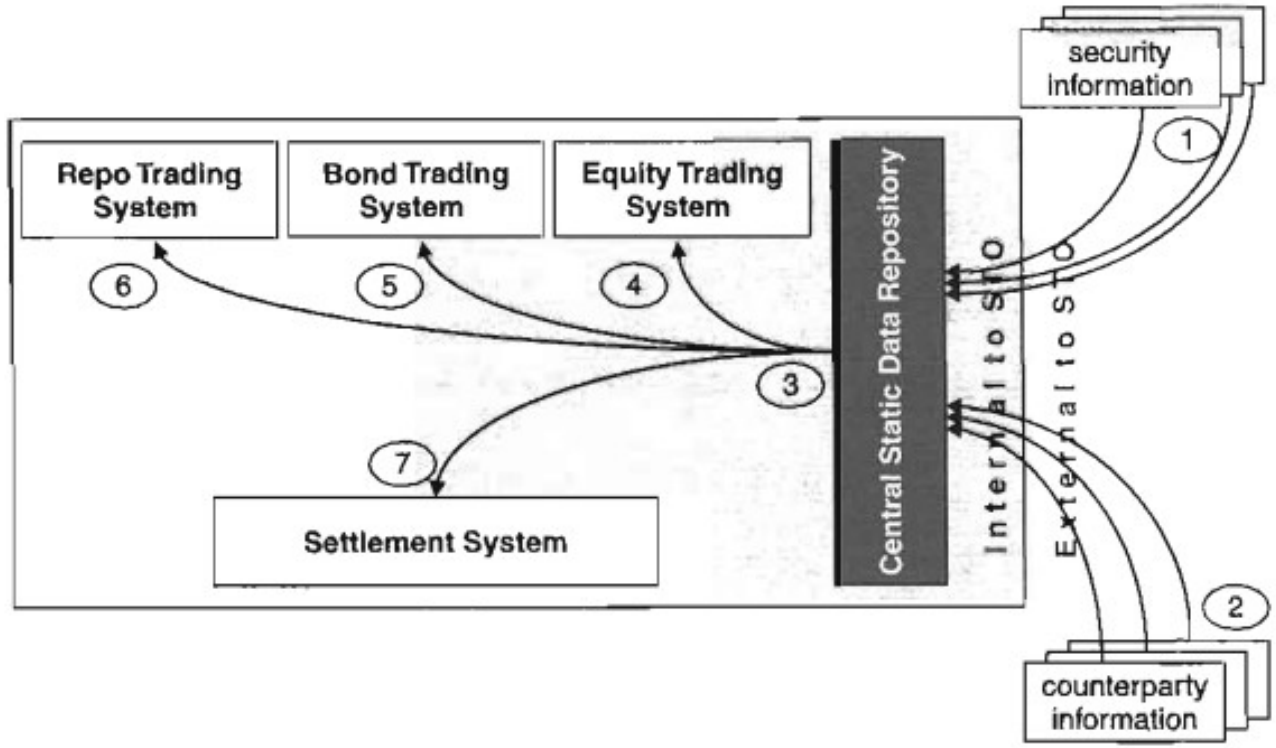

The use of static data is significant in an STO to achieve STP.

Static data is the commonly used term to describe a store of information that is used to determine the appropriate actions necessary to achieve successful processing of each trade.

These data are stored in static data repository called as RDM.

UNDERSTAND REFERENCE DATA MANAGEMENT (RDM)

All the department's system are depended on the RDM, hence its importance is huge and vast.

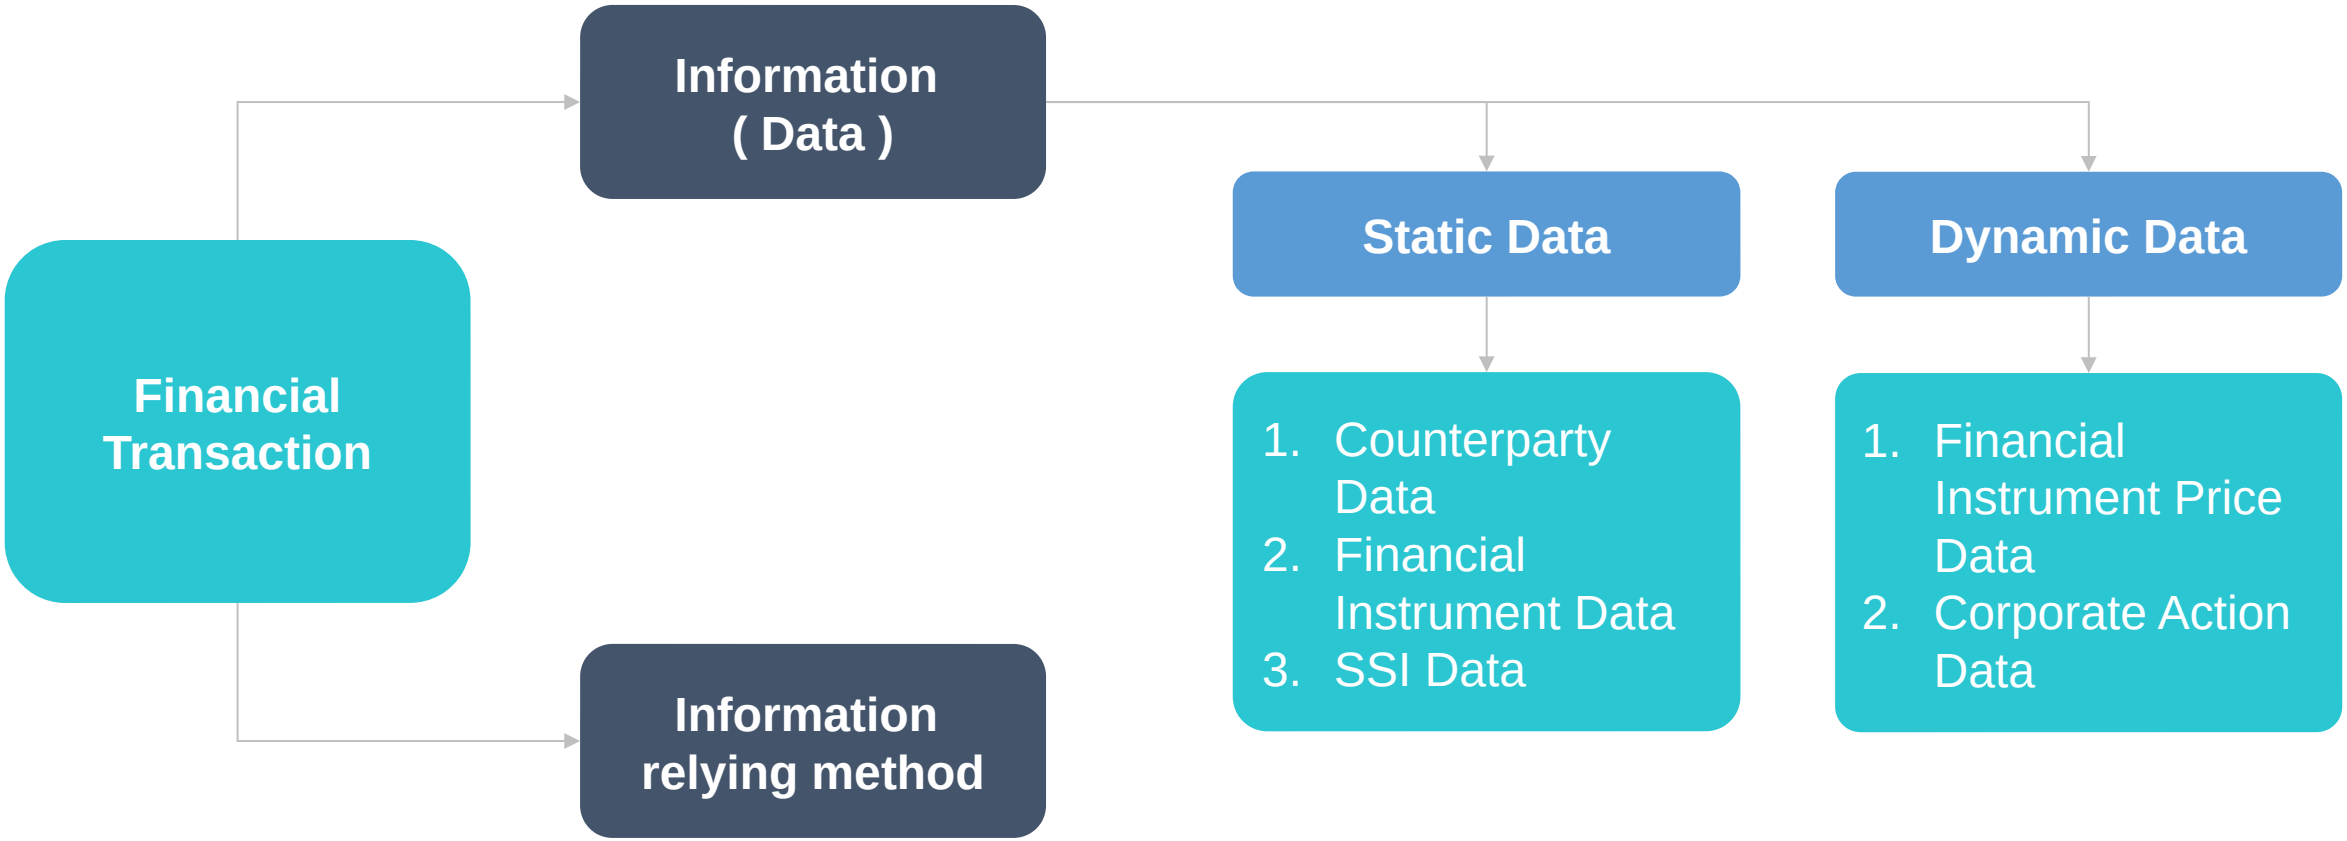

Types of Data

REFERENCE DATA MANAGEMENT

In order to ensure success of a financial transaction , 2 key elements are required .

- Data i.e., Information
- Methods of data communication.

Types of Data

1. Static Data:

1. Static Data:

- Data with unalterable characteristics are called as Static Data. The static data does not require frequent changes.

a) Client & Counterparty Identifiers

- These include like Name , address ,contact details , owners, Legal entity identifiers for ownership structures and hierarchies .Customer legal entity identifiers for ownership structures and hierarchies
- Ex: Department, fund, trading entity, agent, SWIFT BIC code

b) Client & Counterparty trading & delivery data – SSI

- Standing settlement instructions at the level of instruments, funds and markets
- Ex: Nostro ac , Depot ac details etc.

1. Static Data:

c) Financial Instruments/Securities Data:

- Issuer , Numerical codes for trading instruments such as International Securities Identification Numbers (ISINs), national numbers, proprietary numbers defined by commercial data prodders, and cross-reference identifiers , coupon rates, maturities, restrictions and ex dividends etc.
- Ex: Common or preferred stock, corporate or municipal bond, option, future, commodity, swap
- CUSIP (U.S.), SEDOL (U.K.), ISIN, RIC Code (Reuters), symbol (exchange specific), exchange or market traded on (MIC)
- Maturity or expiration date, conversion date and rate, sinking fund provision, deliverable equivalent, reset date

d) Calendar Data:

- Calendar information like exchange Holiday, expiration of contract date for instruments like futures & exchange traded options etc.

e) Credit Rating Data:

- Credit history and industry categorization such as Moody's rating, S&P identifier and rating, Fitch rating, Basel II operational risk reporting category, SEC identifying data

2. Dynamic /Market Data:

2. Dynamic /Market Data:

- Refers To Trading Data .It Is Used In Trading , Dealing Etc.

a) Price Information

- Real Time Quotes
- Historic Data (Prices Of Intraday , EOD)
- Interpretive – Earnings Commentary , Research Report
- Historical and closing price, time series, volatility, correlation, Collateral Prices

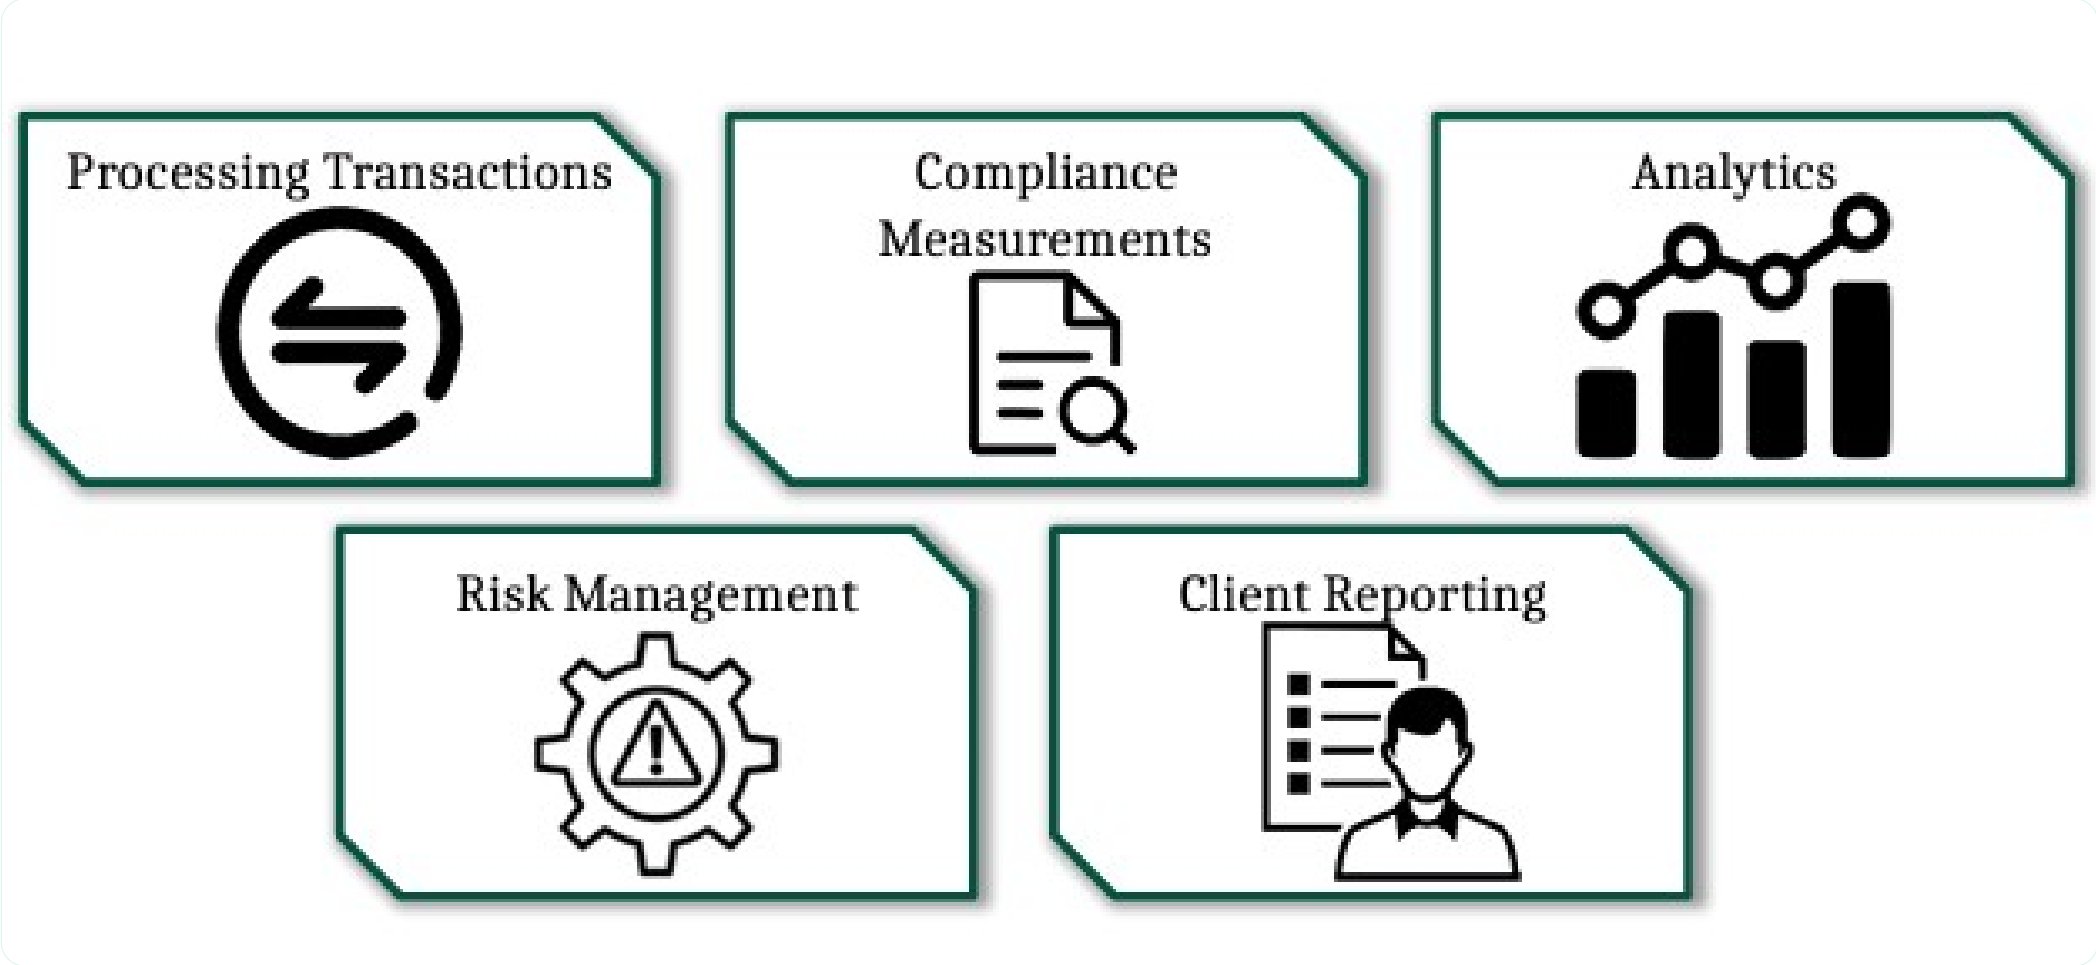

b) Corporate Action Data

- Corporate action announced by the issuer such as dividend , Stock split, proxy notification, merger, tender offer.

Uses of RDM

EXPLAIN THE USES OF RDM

REFERENCE DATA MANAGEMENT

Importance Of Reference Data Management:

- To Improve Data Quality , Usability & Timeliness Of Delivery
- To ensure smooth trades, transactions
- Regulatory Requirements such as MiFID II compliance
- Good RDM ensures accurate, complete, and available static data for critical trading and investment activities.
- Helps to achieve operational efficiency
- Helps to reduce the time, effort, errors, and associated costs of addressing data gaps, exception management, reconciliations,
- Helps to prevent delayed reporting,
- Helps to prevent decision making based on substandard reference data.

RDM Process

REFERENCE DATA MANAGEMENT PROCESS

IMARTICUS LEARNING

Define the Data	Manage the Data	Share the Data	Monitor the Data
Business Terms, Reference Data Sets; Data Model are defined in this stage	Reference Data are collected through various sources and managed based on Hierarchies	Reference Data are shared across various team to manage real time transactions.	Changes in data & frequency of changes are tracked and reported

FUNCTIONS OF A REFERENCE DATA TEAM

1. Data Sourcing & Collection:

- Data are sourced & collected from various sources like
  - Client
  - Market
  - Data Vendors
- Bloomberg, Refinitiv Eikon (previously Thomson Reuters), S&P Capital IQ, PitchBook, Factset, SourceScrub
- Acuris and MergerMarket (both operating under the same parent company),
- The AI-enabled AlphaSense, Sentieo, YCharts, and EMIS,
  - MIS
  - Reports & Publication
  - News Agencies
  - Stock Exchanges – NSE , NYSE ,
  - Regulatory Board – SEC, SEBI , ESMA

FUNCTIONS OF A REFERENCE DATA TEAM

2. **Data Consolidation & Standardization**
   - Data which are sourced from various sources are consolidated into a common model. The data is then standardized for all groups using the reference data applications.
3. **Cleansing And Validation**
   - The data which are sourced from various sources scrubbed & validated in order to ensure no duplication , accuracy & completeness
4. **Coordination**
   - Coordinate manual intervention, as necessary, to handle exceptions that cannot be automatically processed
5. **Data Distribution**
   - Distribute data internally and externally to information consumers such as traders, portfolio managers, accountants, compliance specialists, and business intelligence analysts.

Static Data Examples

Client/Counterparty Data: Data Source – SWIFT

Detailed information about SWIFT Code CITIGB2L

SWIFT CODE	**CITIGB2L**
BANK	**CITIBANK N.A.**
ADDRESS	**CANADA SQUARE, 25 CITIBANK CENTRE**
CITY	**LONDON**
BRANCH	
POSTCODE	**E14 5LB**
COUNTRY	**United Kingdom**
MONEY TRANSFER	**Save on international fees by using Wise**

CITIBANK N.A.

CITI	GB	2L	XXX
Bank Code	Country Code	Location Code	Branch Code

COUNTERPARTY AND CUSTODIAN

OUR STO AS BROKER

OUR COUNTERPARTY AS ANOTHER STO - BROKER

OUR COUNTERPARTY AS CLIENT

Table 9.1

Static data item	Example of a trading company (the STO)	Example of a counterparty (an STO)	Example of a counterparty (an institutional client)	Typical use of data
Full name and location of trading company	World Securities International, London (WSIL)			The STO's heading on trade confirmations and any automated communication issued to counterparties
Full name and location of counterparty		Professional Traders Inc., 22 Bahnhofstrasse, Frankfurt	Solar Fund Managers Pte., 105 Western Road North, Singapore	The addressee on trade confirmations and any automated communication issued to counterparties
Short name of counterparty		PTIF	SFMS	The abbreviated counterparty name used on the STO's internal reports
Counterparty reference number		STO255098	IC106588	The unique counterparty identifier within the STO's books and records
Type of counterparty		STO	Institutional client; fund manager	Categorises counterparties for statistics and management reporting within the STO
Associated counterparties			IC106588A: Solar Far East Fund IC106588B: Solar Pacific Income Fund	Other counterparties that are linked to this counterparty, enabling automated processing
Relationship with associated counterparties			Fund Manager	The basis for allocation of executed trades to the associated counterparties

(continued overleaf)

COUNTERPARTY AND CUSTODIAN

CUSTODIAN NAME AT DIFFERENT LOCATION

Table 9.1 *(continued)*

Static data item	Example of a trading company (the STO)	Example of a counterparty (an STO)	Example of a counterparty (an institutional client)	Typical use of data
Custodian names and locations	C1: Cust. A, Sydney C2: Cust. E, Tokyo C3: Cust. H, Hong Kong C4: Cust. L, New York C5: Cust. P, London C6: Cust. S, Brussels	C1: Cust. B, Melbourne C2: Cust. F, Tokyo C3: Cust. I, Hong Kong C4: Cust. L, New York C5: Cust. Q, London C6: Cust. S, Brussels	C1: Cust. C, Sydney C2: Cust. G, Osaka C3: Cust. J, Hong Kong C4: Cust. M, New York C5: Cust. P, London C6: Cust. S, Brussels	The complete list of an STO's custodians, one of whom will be issued a settlement instruction on an individual trade, containing the counterparty's appropriate custodian (relevant to the security group, such as Japanese equity)
Securities account numbers at each custodian	C1: 5023598 C2: A0078802 C3: 111693XM C4: 334RR126 C5: 9455B1 C6: XA3396269	C1: 5532896 C2: A9096220 C3: 110242TP C4: 339RR098 C5: 2967D2 C6: XA8824179	C1: 5900329 C2: A2022451 C3: 101584GL C4: 331RR443 C5: 7765V3 C6: XA6061349	The specific securities account number over which a securities trade will settle; the relevant account number will be quoted on a settlement instruction sent to the STO's custodian
Cash account numbers at each custodian (and currency of account)	C1: 5023598 (AUD) C2: A0078802 (JPY) C3: 111693XM (HKD) C4: 334RR126 (USD) C5: 9455B1 (GBP) C6: XA3396269 (various)	C1: 5532896 (AUD) C2: A9096220 (JPY) C3: 110242TP (HKD) C4: 339RR098 (USD) C5: 2967D2 (GBP) C6: XA8824179 (various)	C1: 5900329 (AUD) C2: A2022451 (JPY) C3: 101584GL (HKD) C4: 331RR443 (USD) C5: 7765V3 (GBP) C6: XA6061349 (various)	The specific cash account number over which a securities trade will settle; the relevant account number will be quoted on a settlement instruction sent to the custodian

DEPOT AND NOSTRO ACCOUNT FOR SSI

COUNTERPARTY AND CUSTODIAN

Static Data				
Settlement instruction communication method to each custodian	C1: S.W.I.F.T. C2: S.W.I.F.T. C3: Tested Telex C4: S.W.I.F.T. C5: Proprietary C6: Euclid			The medium by which settlement instructions are transmitted to each custodian and bank; typically, there are choices as to the method of transmission (refer Chapter 16 Settlement Instructions)
Trade confirmations		Not required (trades to be compared and matched electronically)	Fax	The medium by which trade confirmations are to be issued to the counterparty (if required)
Trading company membership numbers	ISMA Trax: WSI44662 LSE firm code WS7934			Identification numbers used when, for example, issuing details of trades for regulatory reporting to a regulatory authority
Counterparty membership numbers		ISMA Trax: PT230871		Identification numbers used in the transmission by the STO of trade matching messages (see Chapter 14)

SETTLEMENT INSTRUCTIONS TO BE SEND USING SWIFT

SECURITY DETAILS

IMARTICUS LEARNING

Static data item	Example of a bond	Example of an equity	Typical use of data
Full name of the security	XOX AG 8.25% bonds 1st June 2020	CDE plc GBP 1.00 Ordinary Shares	The formal description of the issue, used on trade confirmations and other correspondence with clients
Short name of the security	XOX 8.25% 1.6.20	CDE Ord	The informal description of the issue, used on the STO's internal reports
Security internal reference	BD00757339	SH00463815	The identifier of the individual security, used internally within the STO
Security external reference	ISIN: XS1234567893	ISIN: GB9876543215	The commonly known security identification number, used for external communication, such as on trade confirmations and settlement instructions
Issued currency	USD	GBP	Quoted on trade confirmations and settlement instructions. Internally, represents the currency of the trading position and the cash owed to/by counterparties
Issued quantity	USD 1,000,000,000.00	100,000,000	Provides a measure of the STO's holding as a percentage of total issued (can have regulatory implications)
Security type	Bond	Equity	Provides internal statistics and reporting by type of security
Security group	Eurobond (USD)	UK Equity	Enables distinguishing of security for static data defaulting
Coupon rate type	Eurobond fixed rate		Enables attachment of attributes such as accrued interest divisor and day count (e.g. 30/360)
Coupon rate	8.25%		Enables calculation of cash value of accrued interest (on trades) and coupon payments
Coupon frequency	Annual		Enables calculation of accrued interest (on trades) and coupon payments
Coupon payment dates	1st June		Enables calculation of accrued interest (on trades) and coupon payments
Primary value date	1st June 2000	16th January 2000	Earliest value date of a new issue and the point from which accrued interest begins to accrue (on a bond)
First coupon payment date	1st June 2001		Enables determination of short, long or regular coupon period
Maturity date	1st June 2020		Identifies the date of capital repayment
Maturity price	100%		Identifies the price of the bond payable by the issuer at maturity
Denominational values and board lots	USD 5000.00 and USD 20,000.00	500 shares	Ensures trades are executed in acceptable denominations
Default trading book	Trading book 'Y'	Trading book 'D'	Enables defaulting of the internal trading book that typically trades this security
Credit rating	AA		Enables calculation of collateral values of this security

EQUITY AND BOND DETAILS SET UP

DETAILS SET UP REQUIRED FOR ACCRUAL CALCULATION

SECURITY DETAILS

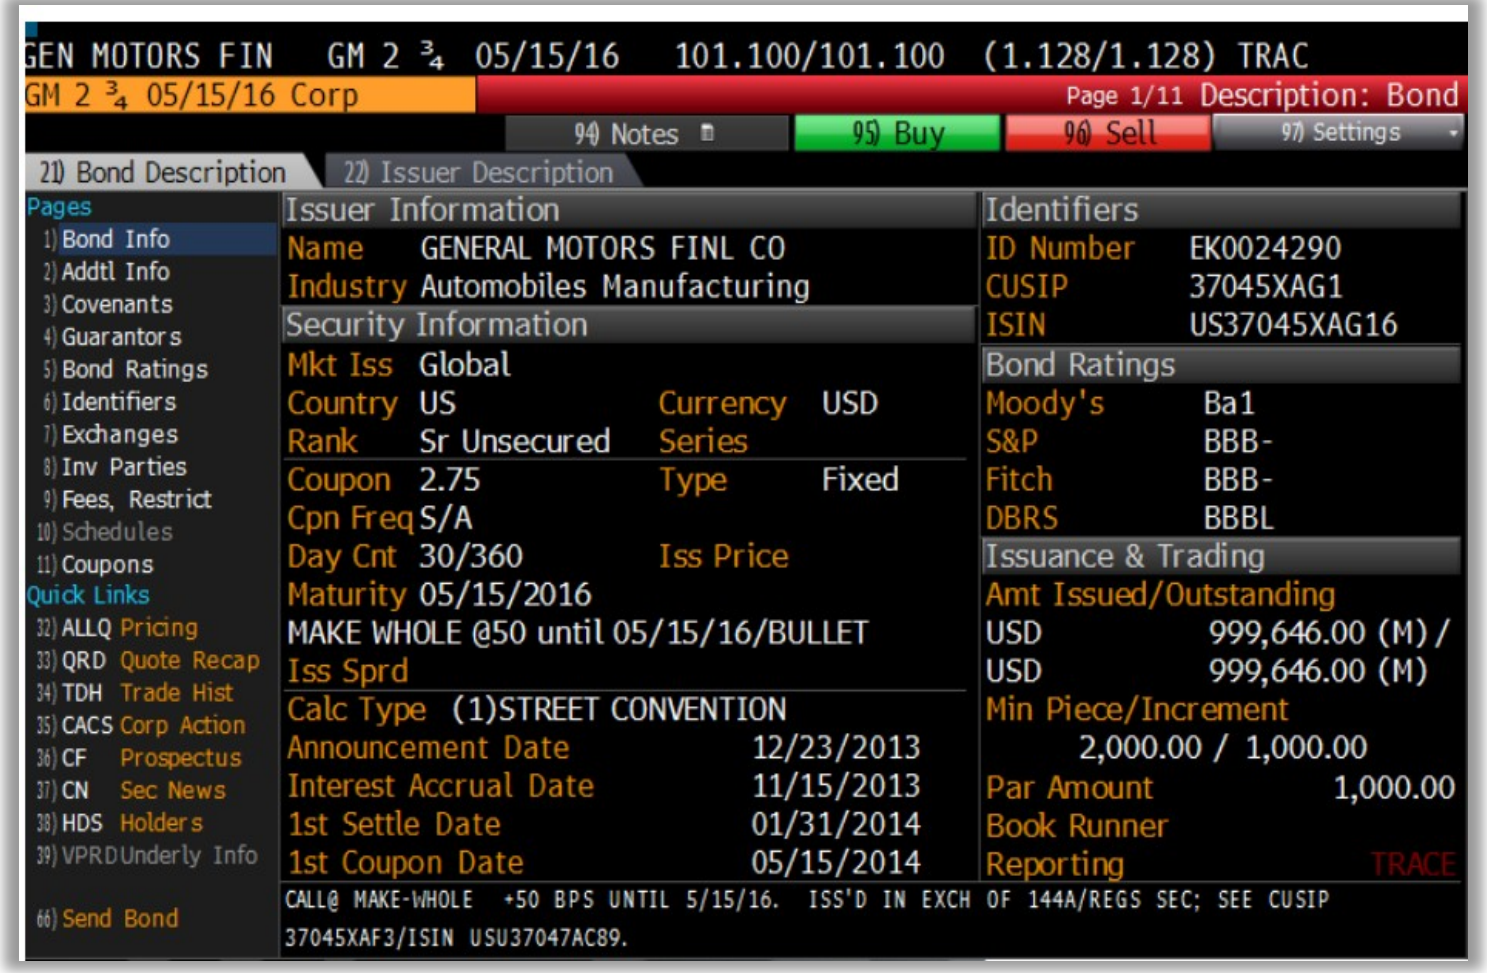

Static data item	Example of a bond	Example of an equity	Typical use
Name of the security group	Eurobond (USD)	UK equity	The name that an STO chooses to give to a security group, which will be attached to the static data of relevant individual securities
Settlement cycle	Trade date plus 3 business days (commonly referred to as T+3)	Trade date plus 5 business days (T+5) changed to T+3 in February 2001	The normal period between trade date and value date, used to calculate the value date of a trade
Custodian	Euroclear	Crest	The custodian used by the STO for settlement
Transfer method	Book entry	Book entry with re-registration	Indicates whether additional time will be taken for registering of purchases
Accrual basis	30/360		The day count and divisor convention for calculation of accrued interest
