Role-Associate AML/KYC

1.Resume Based

- Questions that are directly based on the information mentioned in the candidate's resume.
- Focus on education, work experience, internships, projects, certifications, and skills.
- Assess clarity of roles and responsibilities handled in previous jobs.
- Evaluate understanding of processes, tools, and systems used.
- Validate achievements and quantify impact wherever possible.
- Explore challenges faced and problem-solving ability.
- Check authenticity and depth of knowledge about what is written in the resume.
- Analyze career progression and growth over time.
- Assess alignment of past experience with the role applied for.

2.Communication Skills-

- **Clarity & Structure:** Ability to present thoughts in a clear, organized, and concise manner during discussions, interviews, and client interactions.
- **Articulation:** Improving how confidently and coherently you explain concepts, processes, and problem-solving approaches.
- **Professional Vocabulary:** Using appropriate business and banking terminology while explaining domain topics.

- **Active Listening:** Understanding the question fully before responding, which helps reduce errors and builds confidence.
- **Confidence & Delivery:** Maintaining composure, speaking at a steady pace, and communicating with assurance.

3. Domain Based-

- AML & KYC concepts
- Customer Due Diligence (CDD)
- KYC documentation requirements
- Sanctions screening
- PEP screening
- Transaction Monitoring
- Suspicious Activity Reports (SAR)
