- Fund Assets & Liabilities
- NAV Computation - Case Studies

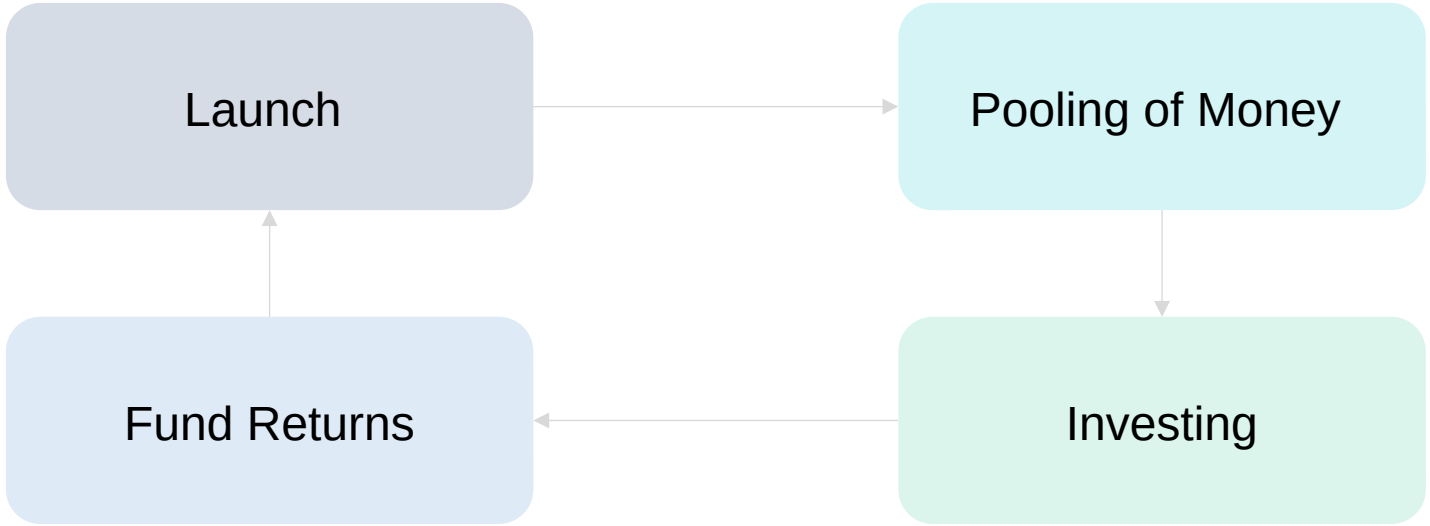

Life Cycle of Fund

LIFE CYCLE OF A FUND

Funds pool money from different investors to invest

Starting from the launch of a fund to the distribution of returns, fund investing is a cycle

Subscriptions, commitments, capital calls, redemptions, transfers , class/currency exchanges.

FUND ADMINISTRATOR'S ROLE BEYOND TRADITIONAL EXPERTISE

IMARTICUS LEARNING

Fund managers depend on administrators for collecting diverse data & fund accounting

- Administrator can undertake some of the tasks in addition to his core tasks.

- Data may be needed in a trouble-free and secure process to complete many processes by filtering & feeding relevant data.

RISK MANAGEMENT & PERFORMANCE MEASUREMENT

A dedicated portfolio management system is fed directly with data independently of fund administration.

A good practice which would allow for a more thorough reconciliation .

Only few fund management companies can afford it.

Both the areas are beyond the scope of administrati on.

RISK MANAGEMENT & PERFORMANCE MEASUREMENT

The fund administration should understand the risk and performance to allow it to feed other systems accurately, on time and completely.

INVESTMENT COMPLIANCE

Fund Manager

Fund

The fund manager needs to observe the fund's exposure against all sorts of criteria identified in its investment prospectus.

INVESTMENT COMPLIANCE

Additional internal limits may be put in place for best practice
Limits apply to parameters like asset allocation based on

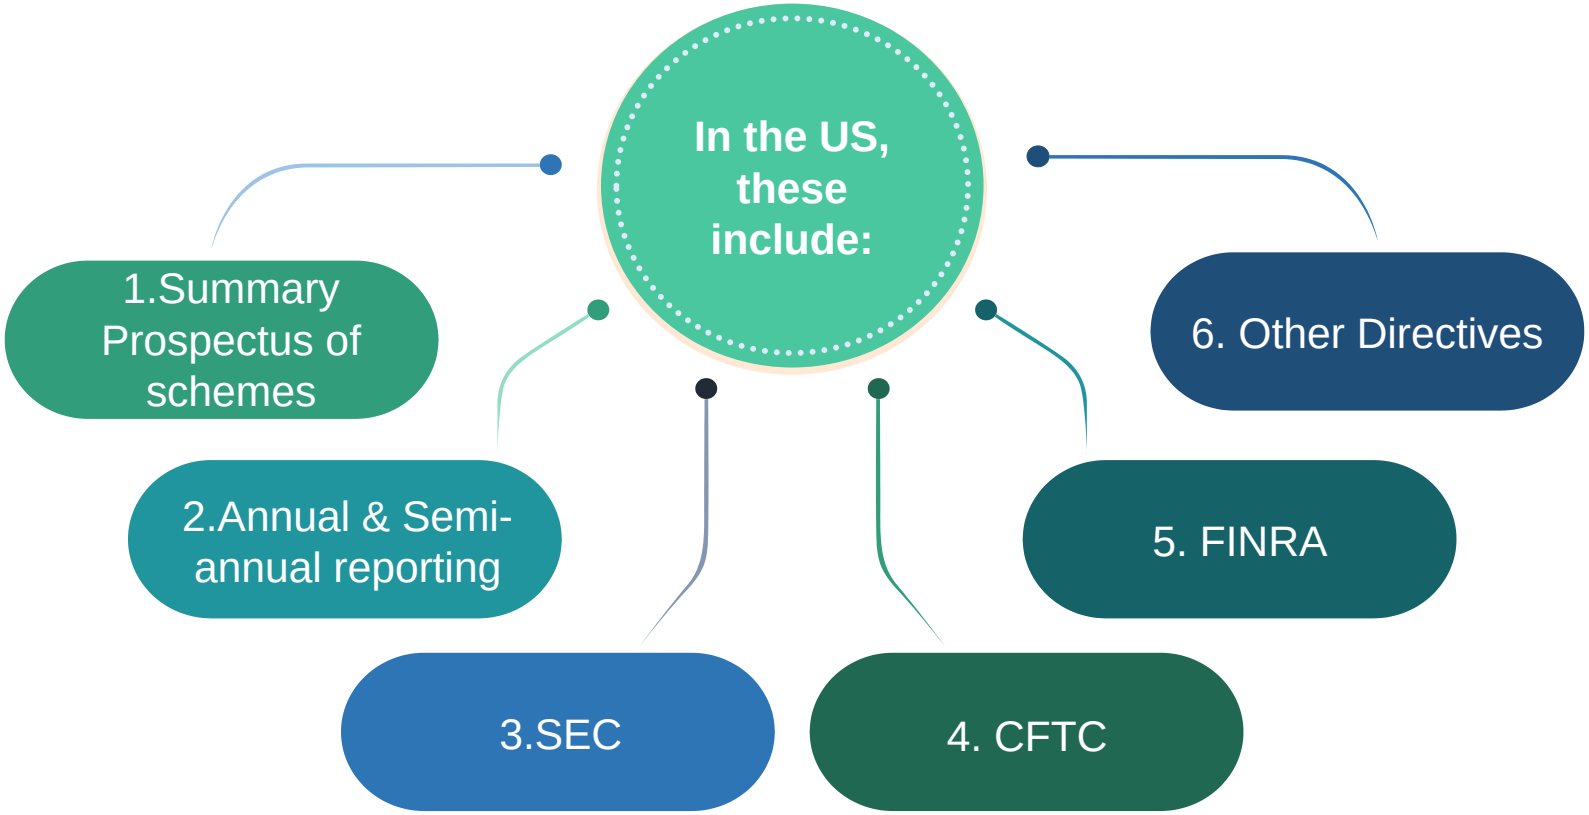

- Region
- Sensitivity to Risk factors
- Exposure (VaR)
- Instrument type
- Currency
- Issuer

The responsibility for respecting such limits may lay with the Fund Management Company, but a Fund Administrator is in charge of verifying such compliance.

Monitoring limit structure on time and accurately is important.

REGULATORY REPORTING

More specialized systems may undertake the responsibility to produce regulatory reports

The relevant information resides in the fund admin which is why it should be the place to produce reports.

Fund systems take a long time to cope with such needs and considered out of their scope.

European Union Hedge Fund regulations

1. AIFMD
2. EMIR
3. Short Selling - EU
4. MIFID II
5. MAD - EU - Market Abuse Directive
6. Other Directives

IMARTICUS LEARNING

Fund Accounting & NAV Computation

FUND ACCOUNTING

IMARTICUS LEARNING

Fund accounting is the process of calculating the daily value of a fund (like mutual funds, hedge funds, ETFs, pension funds) and ensuring the investors' money is handled accurately and transparently.

Financial Records

Fund accounting means maintaining financial records of the fund.

Correct Valuation

It ensures **correct valuation**, **accurate profit/loss calculation**, and **fair unit price** for investors.

Key Output: NAV

The key output of fund accounting is **NAV (Net Asset Value)**.

IMPORTANCE OF FUND ACCOUNTING

IMARTICUS LEARNING

Fund Accounting ensure

1. **Investor trust**
2. **Regulatory compliance (SEBI, SEC, AMD EU etc.)**
3. **Accurate pricing of investor units**
4. **Avoids financial losses due to errors**
5. **Fund Investors subscriptions & redemptions pricing**

Fund accounting is the backbone of investment funds. It ensures accuracy, transparency, and trust by properly recording trades, valuing assets, calculating NAV, and providing financial reports.

IMPORTANCE OF FUND ACCOUNTING

IMARTICUS LEARNING

1. Fund accounting focuses on investor units and NAV, not on profit of a company.
2. Assets are mostly financial instruments (securities, derivatives) instead of fixed assets/inventory.
3. Valuation is usually mark-to-market daily, not historical cost
4. Heavy focus on unit pricing, subscriptions/redemptions, and regulatory rules for funds.
5. Income and gains/losses are allocated pro-rata to investors.

FUND ACCOUNTING

Portfolio / Investment Managers

Custodians and Prime Broker

Fund Administrator

Fund RTA
(Register and Transfer Agent)

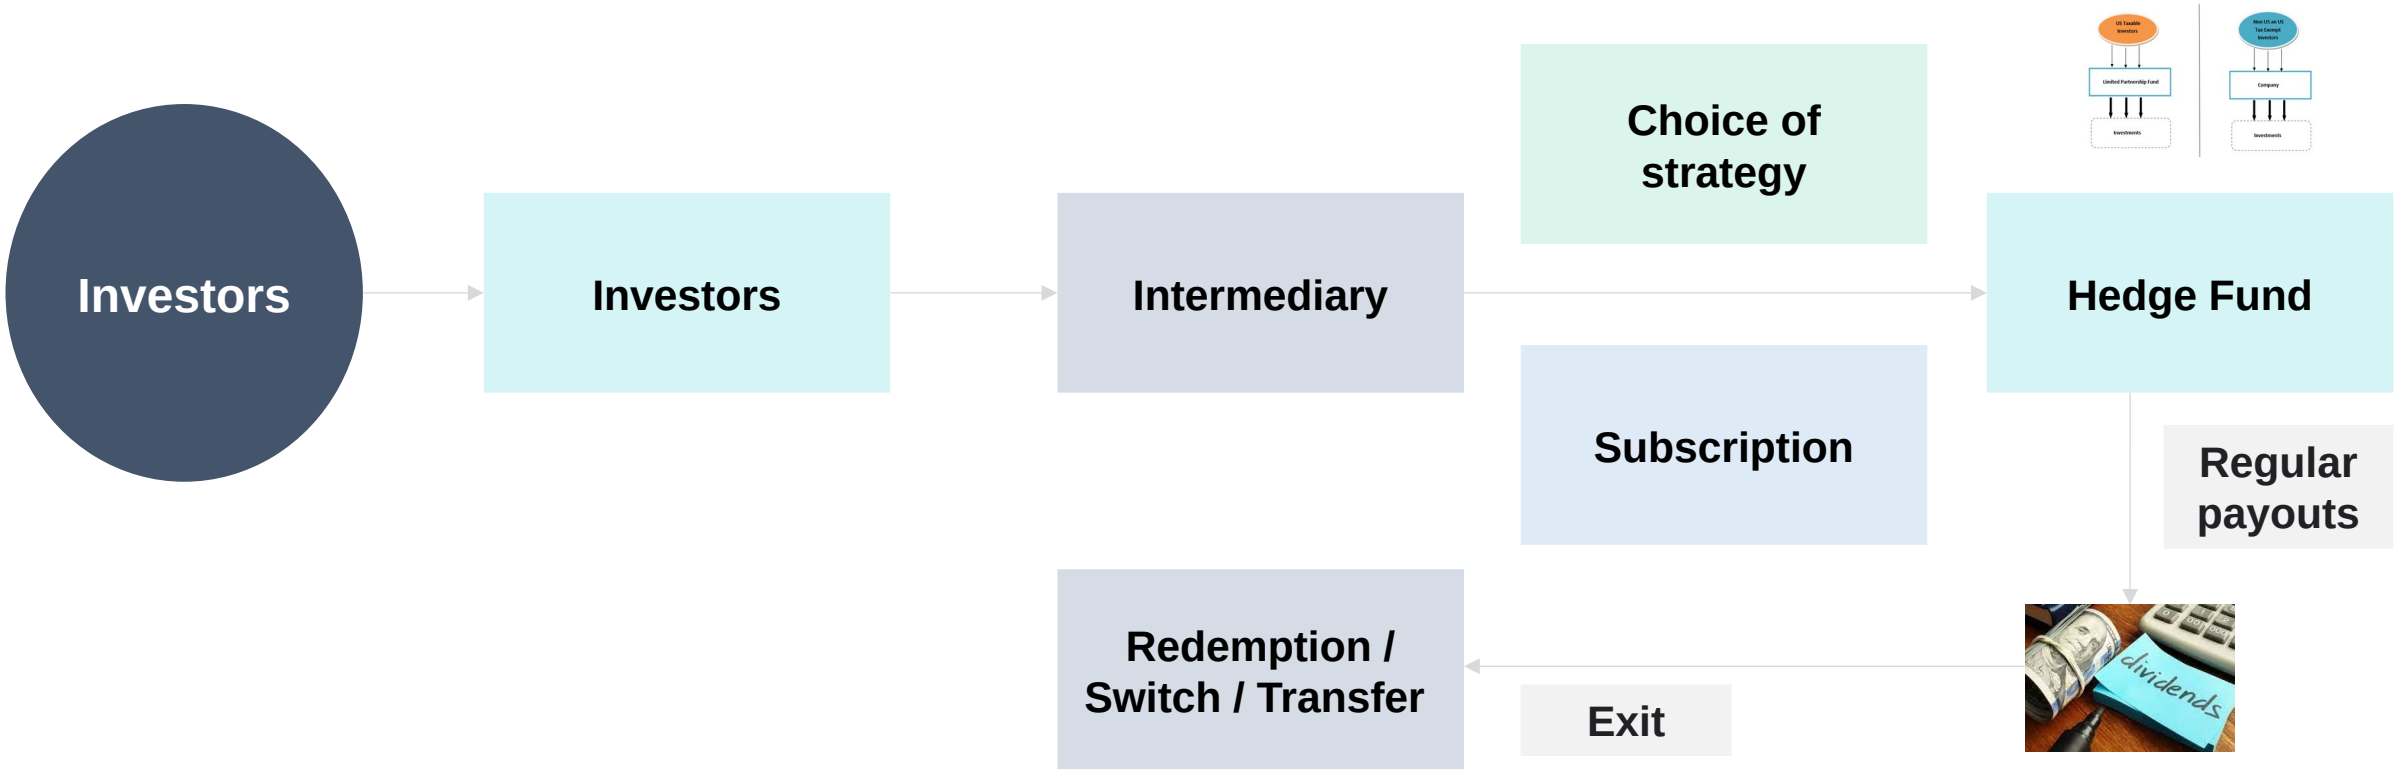

Fund Auditors

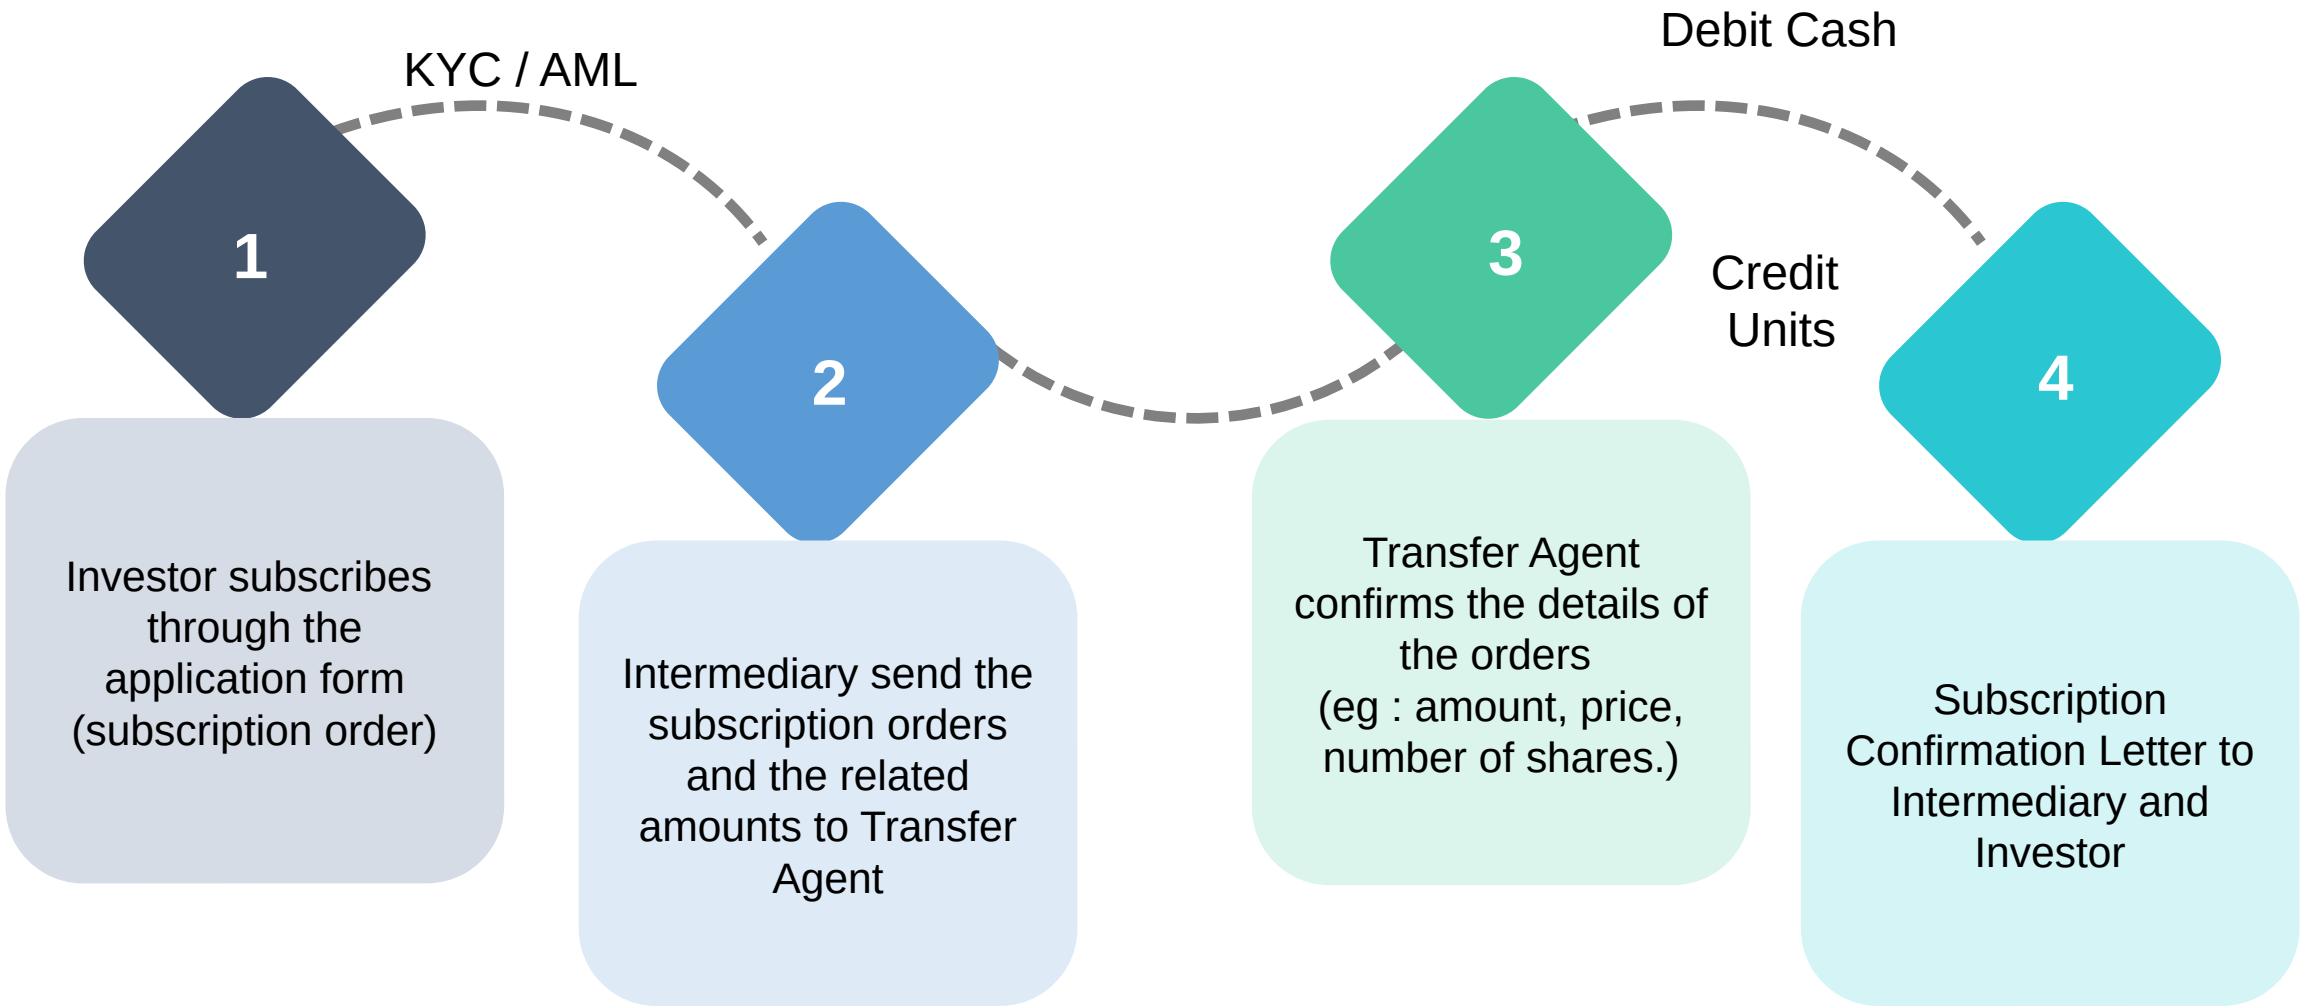

Fund Regulators &
Fund Investor Clients

POOLING OF MONEY

The cash flow statement is usually prepared using cash and cash equivalents as its basis.

SUBSCRIPTION

TERMINOLOGIES

IMARTICUS LEARNING

Subscription	Committed capital	Capital calls	Redemption	Switch
Subscription means the funds paid in cash by the Limited Partners (including the General Partner) to the Partnership for the purchase of their respective Units.	Committed capital is the money that an investor has agreed to contribute to an investment fund. The term is typically used in relation to alternative investments, such as venture capital (VC) and private equity (PE) funds	Capital calls or drawdowns are issued to limited partners when the general partner has identified a new investment and a portion of the limited partner's committed capital is required to pay for that investment.	A process in which an investor sell Units back to the fund. A process of withdrawing units' in order to obtain returns from the fund.	The process of transferring or changing investments. Investors deciding to move investment money between different funds,

NET ASSET VALUE OR NAV

NAV is the most common measure of price of unit of mutual funds.

1. The per-share dollar amount of the fund is based on the total value of all the securities in its portfolio, any liabilities the fund has and the number of fund shares outstanding

2. Mutual funds and Unit Investment Trusts (UITs) generally must calculate their NAV at least once every business day. A closed-end fund is not subject to this requirement.

3. Buy & Sell orders for mutual funds are processed at the NAV of Trade Date.

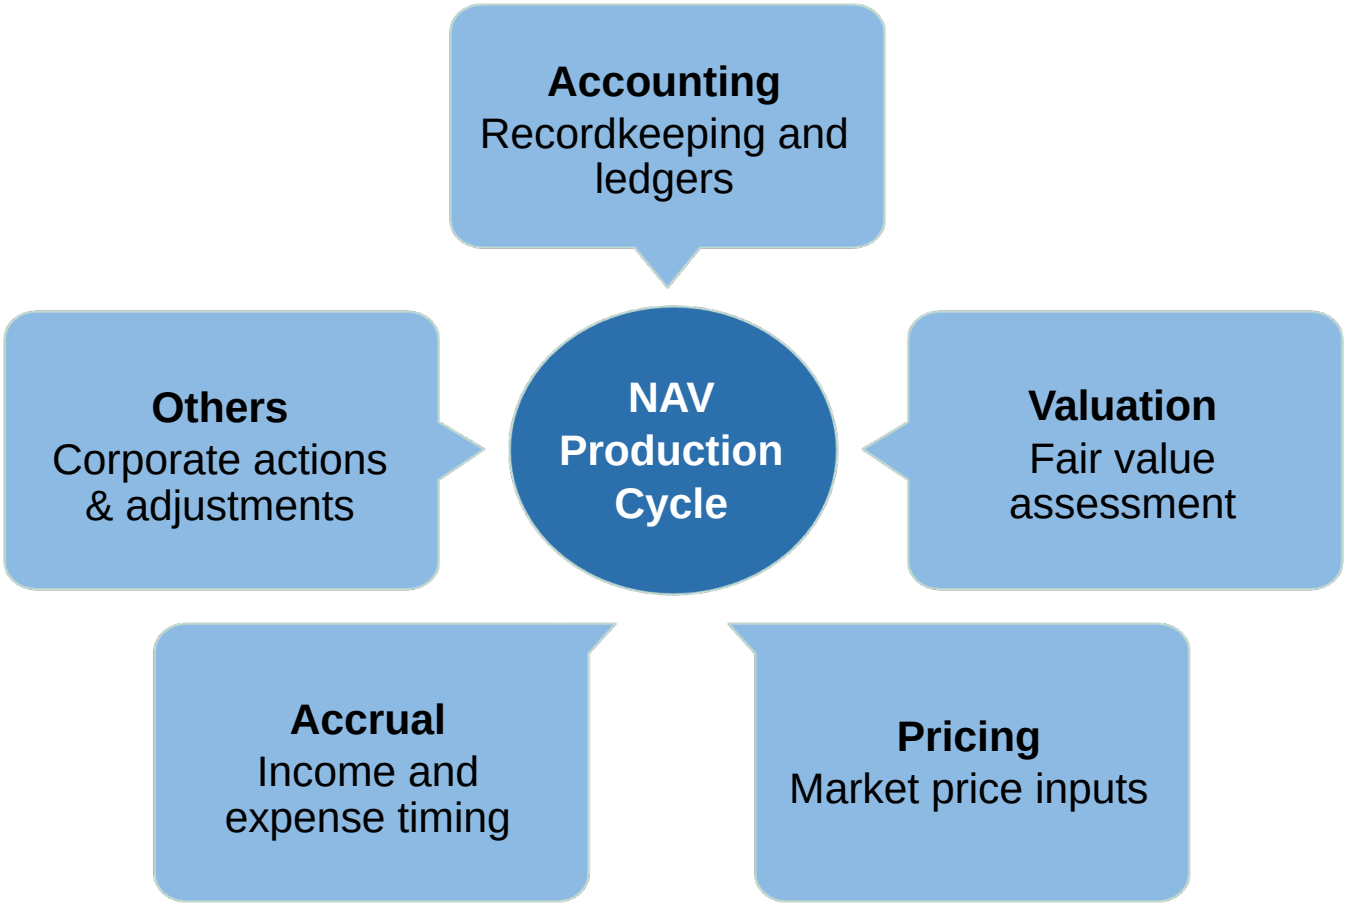

Basis for size of the fund (NAV x number of units) = Asset Under Management AUM

NAV is also the basis for subscription and redemption.

COMPUTING NAV - PRODUCTION CYCLE

IMARTICUS LEARNING

Methodology for computing NAV involves:

The NAV computation methodology is standardized and uniform.

DATA INTEGRITY IN FUND ACCOUNTING

- Accuracy and completeness of all input data (trades, prices, FX, static data).
- Maintained via validations, edit checks, and reconciliations.
- Poor data integrity leads directly to wrong NAV.
- **Static data and its significance**
  - Static data: non-transactional reference data (security master, account details, fee rates, calendars).
  - Drives calculations (e.g., coupon, fees, FX).
  - Errors in static data can cause systemic errors across many NAVs.

REQUISITE SKILLS REQUIRED FOR FUND ACCOUNTING

IMARTICUS LEARNING

1. Strong attention to detail and accuracy.
2. Good understanding of financial products and markets.
3. Good understanding on Trade Life Cycle Process
4. Good understanding on Corporate Actions & their impact
5. Ability to work under time pressure and tight deadlines.
6. Strong reconciliation of Cash/Bank & Stock Positions
7. Strong Analytical Skills
8. Strong Knowledge on Accounting Principles & Standards
9. Clear written and verbal communication.

FUND ACCOUNTING CYCLE - NAV PRODUCTION PROCESS

- Subscriptions by Investors - Funds/Money Accounting
- Trade (Purchase/Sale of Securities) execution by Portfolio Manager.
- Trade capture in OMS (Order Mgt Systems) and confirmation with broker.
- Trade Enrichment: settlement details, commissions, taxes.
- Booking in accounting system on trade date (T).
- Accounting for Purchase / Sale of Securities on credit
- Settlement on value date (T+1/T+2), cash and positions move.
- Accounting for Trade Settlements effecting Bank A/c & Trade Creditors/Receivables

NAV PRODUCTION PROCESS

- Accounting Investment Income on Accrual Basis - Interest & Dividend Income
- Interest or Dividend Income Receivable A/c & Income A/c
- Receipt/Settlement of Income - Bank A/c & Interest/Dividend Receivable A/c
- Accounting Fund Expenses on Accrual Basis - Expenses & Payables
- Expenses Settlement - Payables A/c & Bank/Cash A/c
- Pricing & Valuation of Securities/Investments Held
- Accounting Unrealised MTM Gains/Losses on Investments Held
- Reconciliation with custodian and rectification of breaks.

FUND DOCUMENTS & ITS ROLE IN FUND ACCOUNTING

IMARTICUS LEARNING

FUND PROSPECTUS

- Legal document describing investment objectives, strategy, fees, and risk factors.
- Defines valuation policies, pricing, and expense caps.
- Accounting and operations must comply with terms in prospectus.

FUND OFFERING MEMORANDUM

- Detailed document for sophisticated/private investors describing fund terms.
- Includes subscription/redemption rules, valuation, fees, side letters.
- Accounting team uses OM as reference for applying correct terms.

ERRORS IN NAV ACCOUNTING

- Wrong Securities / Derivatives Prices or FX rates
- Missed Trades
- Missed Corporate Actions
- Incorrect fee calculations
- Incorrect Accruals of Expenses
- Incorrect Accruals of Incomes
- Static data issues (wrong security setup, wrong tax rates)
- Manual errors in adjustments or journals

Private and Confidential

RECONCILIATIONS IN FUND ACCOUNTING

IMARTICUS LEARNING

Cash/Bank Reconciliation

- Comparing cash balances and transactions between fund's GL & Custodian/bank statements.
- Identify and investigate differences (timing, missing entries, wrong amounts).
- Essential control before releasing NAV.

Position/Holding Reconciliation

- Matching quantity of securities in fund's books vs custodian's records.
- Differences can arise due to trades not booked, corporate actions, fails.
- Must be investigated and resolved promptly.

Breaks in Reconciliation

- Difference between two sources (e.g., fund books vs custodian) that is not explained.
- Types: cash breaks, position breaks, FX breaks, price breaks.
- Breaks are logged, assigned, tracked, and resolved.

FUND ADMIN - NAV ACCOUNTING - SERVICE LEVEL AGREEMENT

- Operating model in **Fund Administration Services** is a combination of people, process, systems, and controls used to deliver NAV and reporting.
- NAV release time (e.g., by 8 pm local time).
- Break resolution timelines.
- Response time for client queries.
- Accuracy thresholds and error reporting timelines.
- Understand and acknowledge Client query clearly.
- Investigate NAV components (trades, prices, FX, fees, unit movements).
- Provide clear, data-backed explanation with supporting reports.
- Document query and resolution.

COMPUTATION OF NAV

IMARTICUS LEARNING

Information to be collected business each day to calculate the daily NAV per share

1. The portfolio managers'/traders' listing of portfolio transactions.

2. Custodian listings of cash transactions (income collected, portfolio transactions settled) and other income earned and receivable.

3. Transfer agent summaries of shareholder transactions and resulting cash movements.

4. Securities valuations provided by the fund's pricing service at the predetermined time.

5. Accounting system calculation of daily interest accruals or, through feeds from information services, identification of which equity securities have gone ex-dividend and calculation of the related dividend income.

6. Expense accruals provided by the fund accountant or administrator.

NAV: REVENUE/ EXPENSE ITEMS

Revenue/ expense items to be considered for calculation of NAV

+

- Interest income
- Dividend income
- Realized capital gains
- Valuation gains

−

- Realized capital losses
- Valuation losses
- Scheme expenses

$$NAV = \frac{\text{Fund Asset} - \text{Fund Liabilities}}{\text{Outstanding Shares}}$$

Scheme expenses are calculated on an accrual basis and not when the expenses are incurred.

MARK TO MARKET

IMARTICUS LEARNING

‘Mark to Market’ is the process of valuing each security in the investment portfolio of the scheme at its market value.

Marking the securities to their market value

Investors buy or sell units on the basis of the information contained in the NAV.

Investors

If not marked to market, the investment portfolio will be valued at the security’s purchase cost.

Marking to market helps investors buy and sell units of a scheme at fair prices.

1. Determined based on the calculated and shared information on the NAV

‘Mark-to-market’ NAV helps in assessing the performance of the scheme/fund manager.

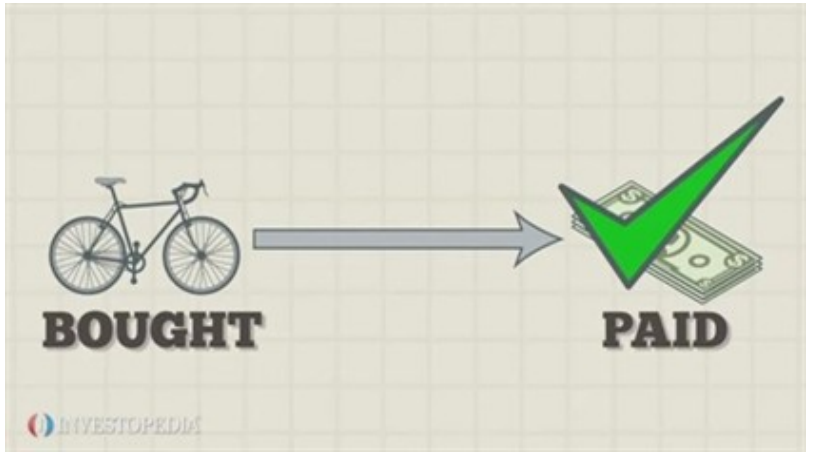

ACCRUAL

A scheme cannot show better profits by delaying payments.

To calculate profits, all the expenses that relate to a period need to be considered, irrespective of whether or not the expense has been paid.

Accrual Principle

Any income that relates to the period will boost profits.

This is irrespective of whether or not it has been received in the bank account.

ACCRUAL BASIS OF ACCOUNTING

IMARTICUS LEARNING

1. Recognizing income and expenses when they are earned/incurred, not when cash is received/paid.
2. Interest Expenses, management fees & other expenses are accrued as & when they are incurred
3. Interest Income is accrued as & when it is earned.
4. Dividend Income is accrued on Ex-Date.
5. Accural Basis of Accounting ensures NAV reflects all earned income and incurred costs up to valuation date.

INTEREST INCOME ACCRUAL BASIS OF ACCOUNTING

Interest Income is accrued daily or monthly based on coupon rate and day count convention.

Daily/Monthly Accrual Entry

- **Debit:** Interest Receivable A/c
- **Credit:** Interest Income

On Coupon Payment Date

- **Debit:** Cash/Bank A/c
- **Credit:** Interest Receivable A/c

Fund Accounting Entry is applied daily or monthly based on Daily/Month-end Accounting conventions established in the fund's operating procedures.

DIVIDEND INCOME ACCOUNTING

Dividend Income is accrued on Ex-Date basis. The Ex-date is the date from which the Stock trades without Corporate Action Benefits.

1

Record Date

Date on which company checks shareholder register to decide who gets dividend.

2

Ex-Dividend Date

Typically, 1 business day before record date, date from which the Stock trades without Corporate Action Benefits. For funds, Dividend income is recognised from ex-date onwards.

3

On Ex-Date Entry

Debit: Dividend Receivable A/c
Credit: Dividend Income A/c

4

On Dividend Payment Date

Debit: Cash/Bank A/c
Credit: Dividend Receivable A/c

COMMON FUND EXPENSES

Asset Management Fees

Custody Fees

Registrar and Transfer Agent Fees

Legal, Regulatory, and Listing Fees

Other Operating Costs
printing, communication, etc., subject to fund docs

Investment Advisory Fees

Fund Administration Fees

Audit Fees

Performance/Incentive Fees

FUND EXPENSES - ACCRUAL BASIS OF ACCOUNTING

Fund Expenses are accrued daily or monthly based on Type of Fund & Accounting Process convention.

Daily/Monthly Accrual Entry

- **Debit:** Expenses A/c (Example: Custodian Fees Expense A/c)
- **Credit:** Expenses Payable A/c (Custodian Fees Payable A/c)

On Expense Settlement/Payment Date

- **Debit:** Expenses Payable A/c (Custodian Fee Payable A/c)
- **Credit:** Cash/Bank A/c (Bank A/c)

Fund Accounting Entry is applied based on Daily or Month-end Accounting conventions, as established in the fund's operating procedures and service level agreements.

CORPT ACTIONS - ACCOUNTING

Corporate Actions are event initiated by the company that affects securities and investors.

1. Examples: Bonus Issue, Stock split, Rights issue, mergers, spin-offs etc.
2. Compare corporate action data from multiple vendors/custodians.
3. Verify key terms: record date, ex-date, pay date, rate, options.
4. Match entitlements (quantity, amount) with custodians.
5. Review and approve bookings via maker–checker process.

CORPT ACTIONS - BONUS & STOCKSPLIT ACCOUNTING

IMARTICUS LEARNING

Bonus issue treatment in Fund Accounting

- Fund receives additional shares free of cost.
- Total cost is spread over old + new shares.
- Per-share cost reduces; total carrying value generally unchanged.
- Usually no immediate P&L impact.

Stock split increases number of shares and reduces price proportionately.

- Total market value of holding usually remains same.
- Adjust quantity and cost per share; total cost remains unchanged.
- No immediate P&L impact.

CORPT ACTIONS - RIGHTS SHARES ISSUE ACCOUNTING

A security giving stockholders entitlement to purchase new shares issued by the corporation at a predetermined price (normally less than the current market price).

- The entitlement is in proportion to the number of shares already owned.
- Rights are issued only for a short period of time, after which they expire.
- This also known as "**subscription rights**" or "**share purchase rights**."

Recognition of Rights

- Recognise rights as an asset if they have market value.

If Rights Are Exercised

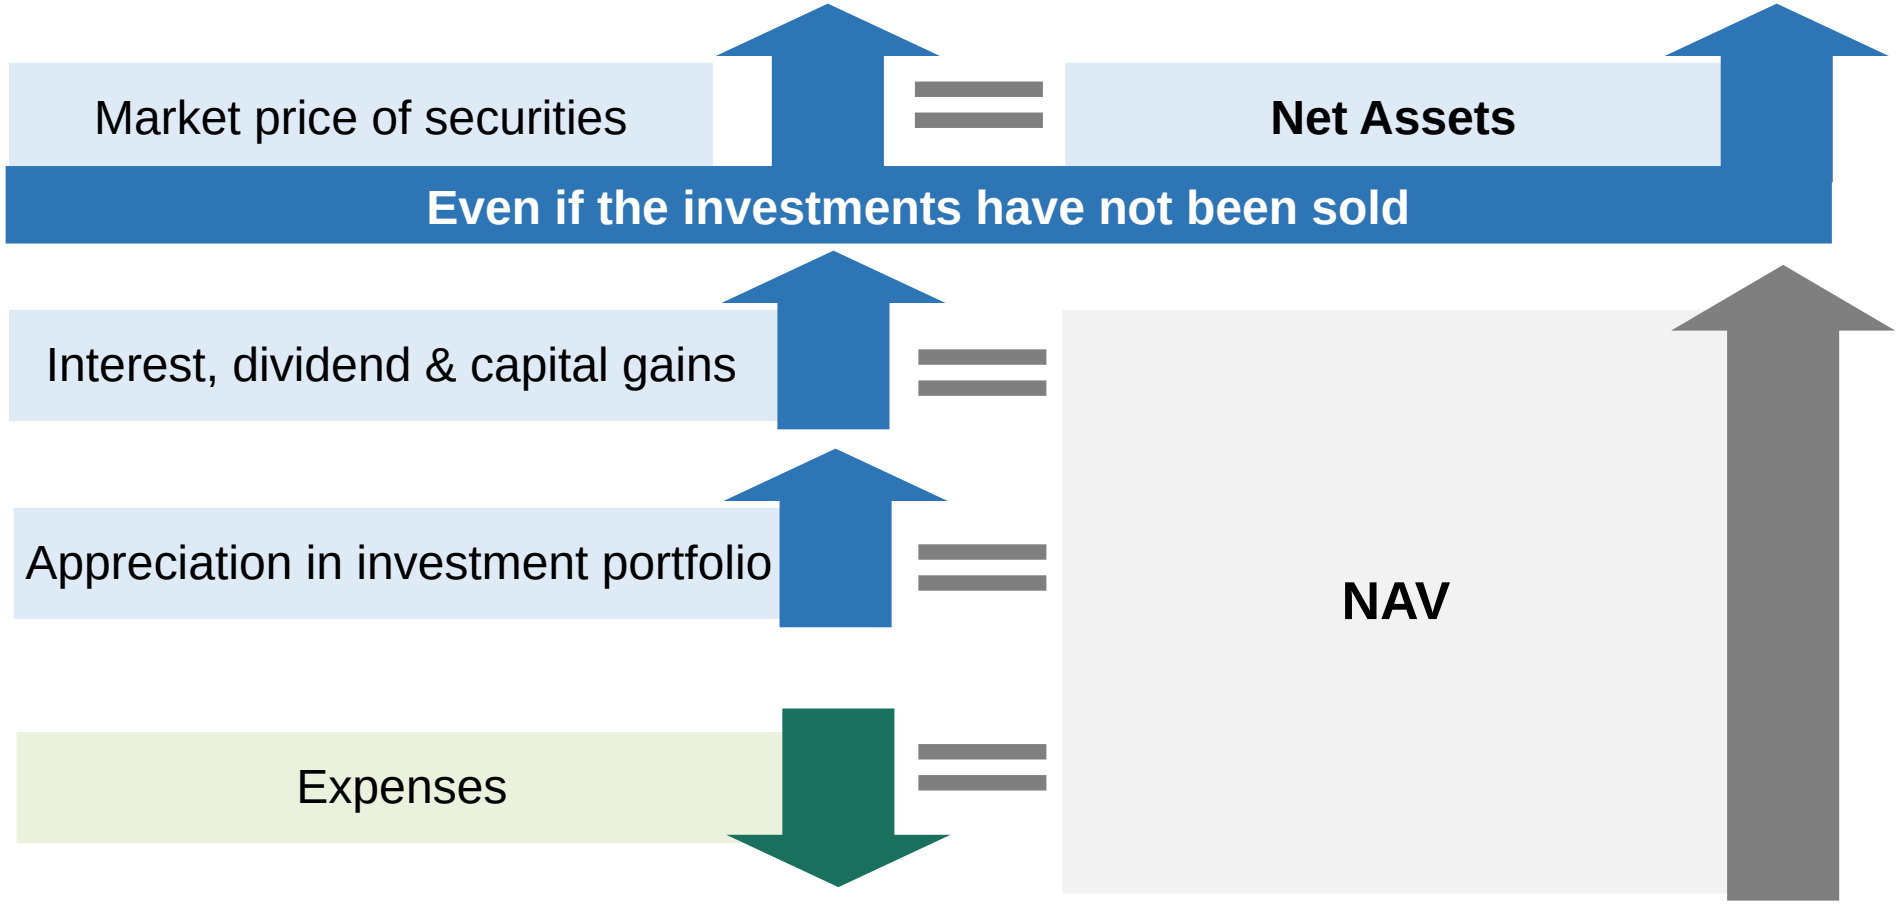

- **Debit:** Investment (new shares).
- **Credit:** Cash (subscription amount).

If Rights Are Sold

- **Debit:** Cash.
- **Credit:** Gain on sale of rights.

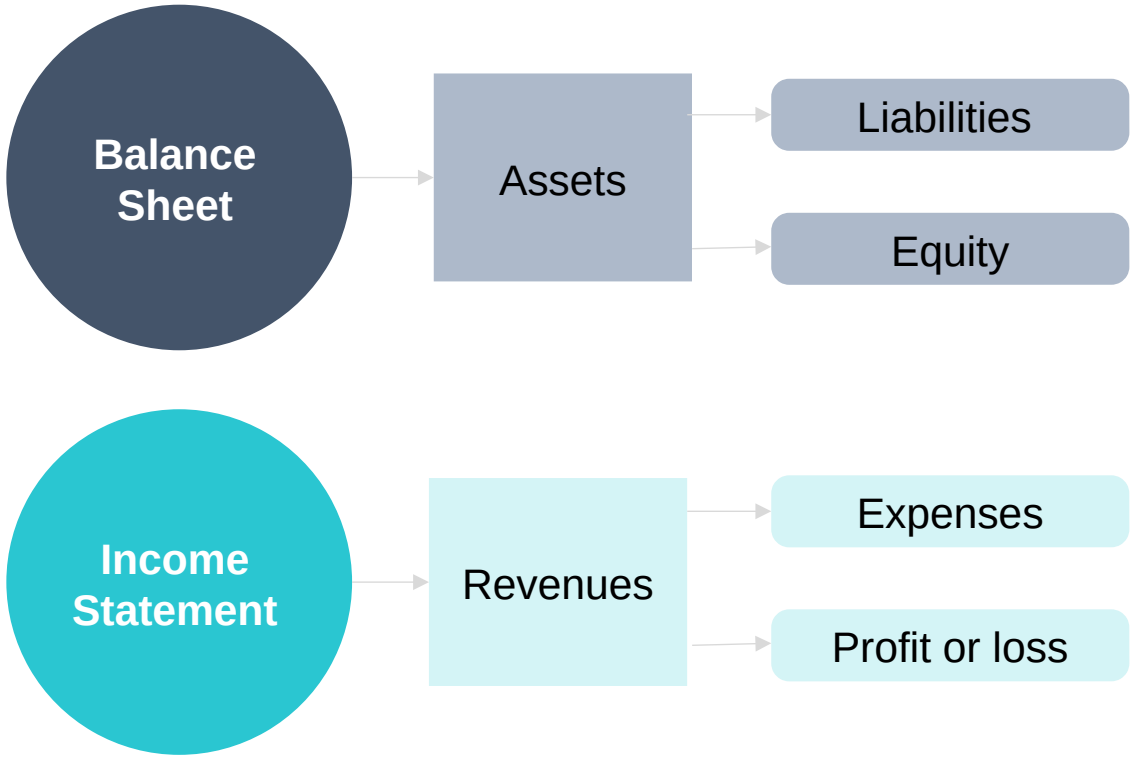

IMPACT OF INCOME/EXPENSES, MARKET PRICES & CORPT ACTIONS ON NAV

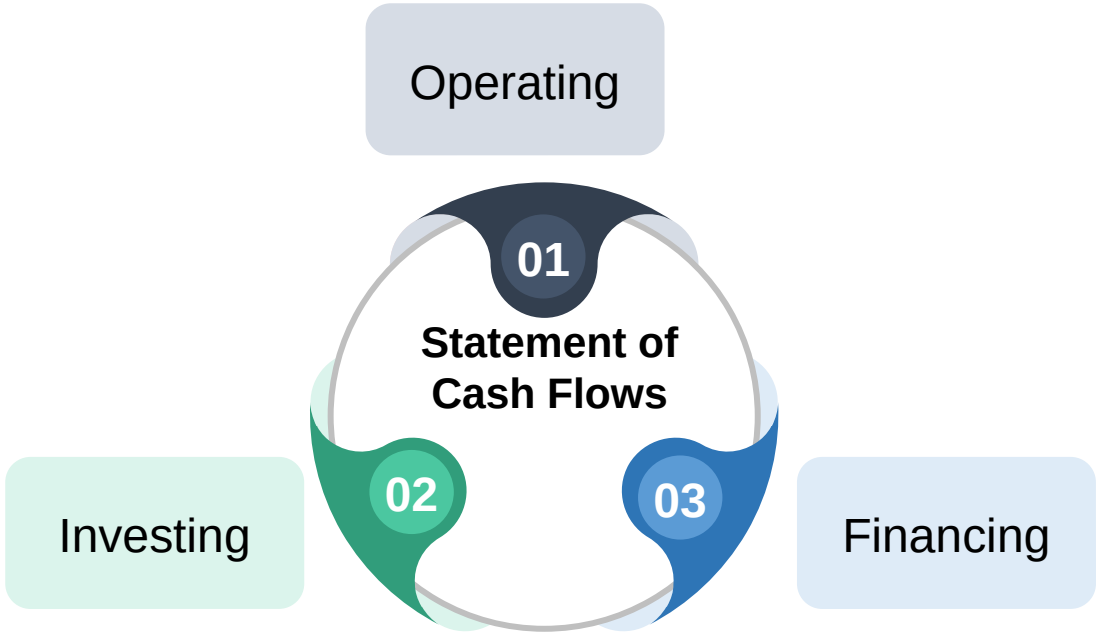

Net assets include the amounts originally invested, the profits booked in the scheme, as well as appreciation in the investment portfolio.

FINANCIAL STATEMENTS

Financial Statements are a record of the financial activities of a business

Financial Statements are a tool to analyze your company's performance.

KEY FINANCIAL STATEMENTS IN FUND ACCOUNTING

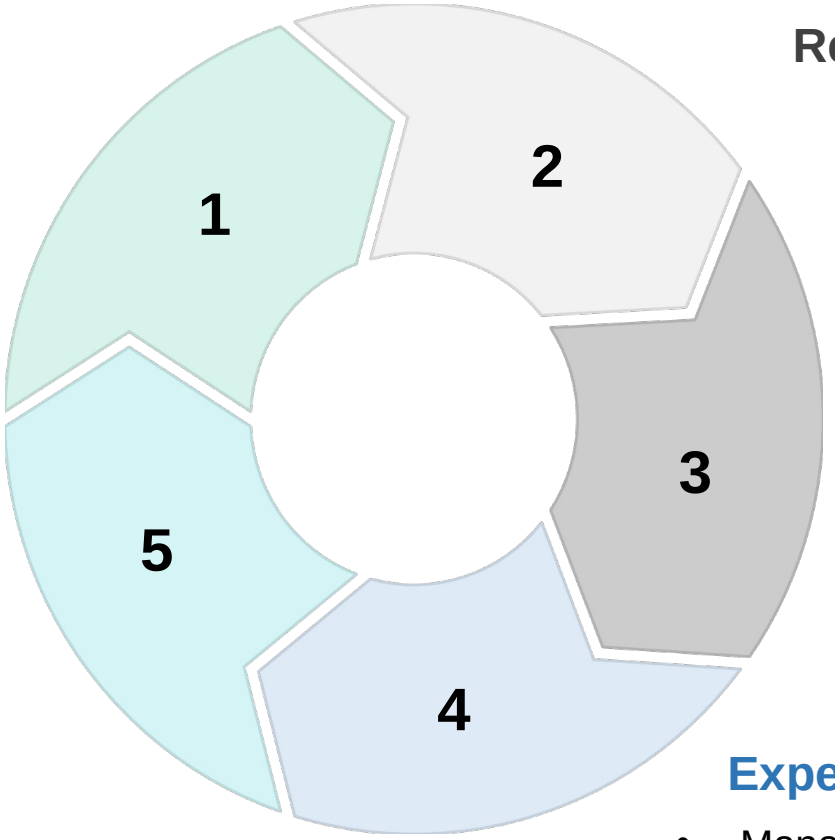

IMARTICUS LEARNING

1. Statement of Operations (P&L).
2. Statement of Assets and Liabilities (Balance Sheet).
3. Statement of Changes in Investors-Partners Equity.
4. Statement of Cash Flows (sometimes optional for certain funds).
5. Notes to accounts.

PROFIT & LOSS - FUND STATEMENT OF OPERATIONS

Investment income

Dividends, Interest/Coupon Income

Realised and Unrealized Gains

Total investment income (net of withholding tax)

Net Income from operations

Expenses

- Management, custody, admin, other
- Realized & Unrealized Losses

INCOME STATEMENT

Also known as statement of operations or Statement of Profit and loss.

- **Revenues**
- **Operating Expenses**
- **Gross profit**
- **Indirect operating cost (S G & A)**
- **Operating Income (EBIT)**
- **Cost of financing**
- **Taxes**
- **Net Income**

The "what did we do" statement 1

Necessary for a company to produce the balance sheet

Income – expenses = net income 2

Detailed items that make up the retained earnings are shown in the Income statement

Financial Statements are a tool to analyze your company's performance.

COMMON FUND EXPENSES

IMARTICUS LEARNING

Asset Management Fees

Investment Advisory Fees

Custody Fees

Fund Administration Fees

Registrar and Transfer Agent Fees

Audit Fees

Legal, Regulatory, and Listing Fees

Performance/Incentive Fees

Other Operating Costs

Printing, communication, etc., subject to fund docs.

EXAMPLE - FUND P & L STATEMENT

IMARTICUS LEARNING

Statement of Operations Year Ended December 31, 20XX

Investment income	Dividends (net of $218,000 of foreign withholding taxes)	3,118,000	
	Interest	3,090,000	
Total investment income			6,208,000
Expenses	Management fees	8,765,000	
	Professional fees and other expenses	3,265,000	
	Interest and dividends	2,234,000	
	Other	221,000	
Total expenses			14,485,000
Net investment income (loss)			(8,277,000)
Realized and unrealized gain on investments, derivatives, and foreign currency transactions	Net realized gain (loss) on investments, derivatives, and foreign currency transactions	57,631,000	
	Net change in unrealized appreciation or depreciation of investments, derivatives, and foreign currency transactions	39,864,000	
Net realized and unrealized gain on investments, derivatives, and foreign currency transaction			97,495,000
Net income (loss)			**89,218,000**

FUND INCOME STATEMENT

Explanations :

1. **Withholding Tax:**
   - A withholding tax is an amount of money that is taken in advance from someone's income, in order to pay some of the tax they will owe.
   - Tax deducted at source from income, especially from dividends, paid to nonresidents of a country, which may be reclaimed if a double-taxation agreement exists between the country in which the income is paid and the country of residence of the recipient.

2. **Management Fees:**
   Management fee is charged on the value of investor's equity in the fund. If the fund experiences a loss and the value of the assets go down, so does the fee generated by the management. This ensures that the incentives of the management are aligned with that of the investors

3. **Realized and Unrealized Gains and Losses:**
   Realized gains or losses refer to profits or losses from completed transactions. A realized gain is when an investment is sold for a higher price than it was purchased. An unrealized ("paper") gain, on the other hand, is one that has not been realized yet

BALANCE SHEET

Also known as Statement of Financial Position

Assets = Liabilities + Equity

Consists of

(Hence "balance" sheet}

1	**Assets**	What the Fund Owns
2	**Liabilities**	What the Fund Owes
3	**Equities**	What is the Fund Investors Worth

At a particular point of time

FUND ASSETS & LIABILITIES

Net asset value (NAV) is the value of an entity's assets minus the value of its liabilities

Value of the fund's assets		Claims against the fund
Cash and deposits + Tradable securities + Non-tradable securities + Derivative instruments + Revese REPO transactions + Units or shares of investment funds + Trade Receivables + Other assets	–	Asst Management fees – accrued & unpaid + Depository charges – accrued and unpaid + Trade Payables + Due to unit holders for redemption / repurchase of units + Payments due on transactions made on account of funds and service fees + Loans-Borrowings + Audit/Legal Fees - Accrued & unpaid + Other Accrued expenses and claims

Divided by

Number of units / shares held

CASE STUDY - HEDGE FUND BALANCE SHEET

IMARTICUS LEARNING

KKR Hedge Fund, LP - Statement of Assets and Liabilities December 31, 20XX (in USD)

Assets	
481,797,000	Investments in securities, at fair value
371,692,000	Investments in private investment companies, at fair value
42,466,000	Derivative contracts, at fair value
23,000,000	Repurchase agreements, at fair value
77,548,000	Cash and cash equivalents
52,000,000	Cash denominated in foreign currencies
5,280,000	Collateral posted with counterparties for derivatives
82,681,000	Dues Receivables from brokers
81,000.000	Trade Receivables for pending investment trade settlement transactions
3,525,000	Accrued Interest Receivable
217,000	Accrued Dividends receivable
72,000	Other assets
1,221,278,000	**Total**

CASE STUDY - HEDGE FUND BALANCE SHEET

IMARTICUS LEARNING

KKR Hedge Fund LLP - Statement of Assets and Liabilities December 31, 20XX (in USD)

Liabilities	
Securities sold short, at fair value	77,626,000
Advance capital contributions	50,000
Trades Payables for pending Trade Transactions	1,003,000
Borrowings/Loans	53,496,000
Due to brokers	78,000
Accrued Interest payable	188,000
Accrued Asset Management Fees Payable	361,000
Accrued Expenses Payables	3,652,000
Total liabilities	136,454,000
Partners - Owners Capital	1,084,824,000
Total Liabilities + Equity Capital	1,221,278,000

Assets = Liabilities + Owners Equity

SHADOW FUND ACCOUNTING - BY FUND MANAGERS/INTERNAL TEAM

Shadow NAV is the actual NAV calculation finished with the objective of confirming the official NAV.

1. Independent replication of accounting records by a third party or internal team.
2. Used to verify administrator/custodian NAV calculations.
3. Helps detect errors or fraud.

Why Funds Should Shadow their Fund Administrator:

1. **Pricing Issues**
2. **Staffing Concerns**
3. **Investor Protection**
4. **Regulatory Requirement**

NAV COMPUTATION - CASE STUDY

Particulars	Amount
Assets of the Fund	**Million US$**
Cash & Bank Balance	100
Current Market Value of Securities held	4255
Trade Receivables	270
Accrued Income Receivable (Interest Income/Dividend)	50
Derivative +ve MTM Balance	30
Total Assets of the Fund Scheme	4705
Liabilities of the Fund Scheme	
Trade Payables	200
Loans from FI/Banks	100
Accrued Expenses Payable (Management/Audit/Custodian Fees)	50
Total Liabilities of Fund Scheme	350
Net Asset Value of the Fund Scheme	**4355**

NAV PER UNIT

NAV per unit or Share Calculation	
NAV per unit = Fund Scheme Assets - Liabilities or per share	**TA - TL** **# of Units**
Number of units/shares issued under this scheme	**35.2535 Million units**
NAV per unit =	**4355 / 35.2535 = 123.5338 $ per unit**

NAV CASE STUDY

IMARTICUS LEARNING

Line Items explanation:

Market Value of Securities

This NAV calculation has been done as at the close of business and the market value of the securities portfolio has been calculated using the closing market prices as on EOD . The fund pricing policy determines the type of price used. It is often the last traded price.

Trade Receivables

The value of Trade Debtors Receivables from Counterparties for the Sale of Securities pending Settlement .

Cash/Bank Balance

The cash balance is straightforward. It’s simply the cash sitting in the fund’s cash account at the close of business of the NAV calculation day.

NAV CASE STUDY

Derivatives MTM Gains

- The unrealised gains on open Derivatives positions is calculated by comparing the closing Derivatives Prices EOD with the rate at which the position was opened.

Income Receivable

- NAV accounting is done on an accruals basis. So, income and expenses are recognised in the period to which they relate. This is often different to the point where the cash is actually received or paid.
- Regarding dividend income, the fund includes the income on ex-date. The dividend income receivable will probably be received during October . But because we're fund accounting on an accruals basis, it is included in the NAV Calculation.

Trade Creditors/Payablse

- The value of Trade Creditors Payables to Counterparties for the Purchase of Securities pending Settlement .

NAV CASE STUDY

IMARTICUS LEARNING

Expenses Payable

As discussed above, NAV accounting is done on an accruals basis. So expenses are recognized in the period to which they relate. The fund recognizes expenses that have been incurred up to that point. The expenses payable amount reflected in the NAV calculation includes, for example, the management fee and the administration fee incurred

NAV per share

The total net asset value is 4355 Million US$ (Fund NAV) . The number of fund shares in issue as on the date is 35.2535 million units . So, the NAV per share or unit is $123.5338.

NAV Calculation for Partnerships

If the fund is a partnership, no shares or units are issued and the NAV consists of an allocation of fund gains/losses across the partnership capital accounts based on % of partnership.
